Introduction

Following a change in management control a few years ago, we had two choices.

One. Grow steadily and organically.

Two. Catch up with lost time.
We took the road less travelled.

That has made all the difference.

CORPORATE SNAPSHOT

Vision

To manufacture equipment to the customer's satisfaction within the acceptable time and price with continuous improvements in the manufacturing process.

Background

The Company's engineering business started operations in 1974 and the Company is now a complete process plant equipment providing company in India. It provides a complete package of engineering and infrastructure solutions by carrying out designing, engineering, manufacturing, fabrication and installation. Its products cover various categories in Heavy Equipment, Machinery and Systems for Hydro

Carbon Sector, Oil & Gas, Steel Plant Equipments, Power Plants, Nuclear Plant, Boilers and Turnkey Projects. Its facilities have been approved by various authorities like Industrial Boiler Regulatory Authority, SGS UK, Petroleum and Explosives Safety Organisation etc.

Listing

Lloyds Engineering Works Limited is listed on BSE Limited (BSE) and National Stock Exchange of India Limited (NSE)

with a market capitalisation (NSE) of Rs.5,614.41 crore as on 31st March, 2024.

Manufacturing Facilities

The Company has state-of-the-art facilities located in Murbad, Thane. All workshops are adjacent to each other, generating significant cost dynamics. The five workshops named A, B, C, D and K3 are spread across eight acres, located 84 kms from Jawaharlal Nehru Port Trust and 1 Km from the National Highway.

Major machineries

- CNC 4 axis tube bending machine capable of bending tube upto 114 diameter x 6 thick x 65 m in serpentine length (1D bend upto 50.8 diameter).
- CNC Deep hole tube sheet drilling machine upto 65 diameter x 1000 mm
- CNC profile cutting machines 3 meter x 12 meter
- 8 torch panel welding machine (Panel Processing Machine)
- SAW machines upto 6.50 meter height
- Hydraulic plate bending machine (75 thick x 3 meter width), (125 thick x 1 meter width).
- Hydraulic press 2000 metric ton.
- Skoda Spindle diameter 250 mm, X axis 10 meter Y axis 4 meter Z axis 2.2 meter Floor Table 10 meter x 3.5 meter (Rotary Table 2 meter x 2 meter).
- Vertical turret lathe upto 6.00 meter diameter x 2.50 meter height.
- Mass drilling machine upto 65 mm diameter
- Stress relieving furnace 6.50 meter x 6.50 meter x 14 meter

Products and services

The Company is engaged in the design and manufacturing of heavy equipment, machinery and systems for the hydrocarbons sector, oil & gas, steel plants, power plants, nuclear plant, boilers and turnkey projects.

The manufacturing facility was set up in Andheri, Mumbai, in 1974 and later shifted to MIDC Murbad. LEWL executed projects for various steel plants, comprising equipment for steel melting shops, rolling mills, processing lines, cold rolling mill complex and raw material handling plants for sponge iron and pellet plants.

The Company is engaged in executing marine loading/unloading arms, truck / tanker / rail loading arms for products such as LPG, petroleum, chemicals, acids, liquid ammonia and sulphur; it also supplied boilers with instrumentation and electrical equipment.

Presence

The Company's corporate office is located in A-2, Madhu Estate, Second Floor Pandurang Budhkar Marg, Lower Parel, Mumbai. The company has state-of-the-art facilities in Murbad, Thane.

Our clients

The Company comprises a robust portfolio of clients, addressed with innovation, customisation, and precision in a cost and time-efficient manner.

Employees

The Company comprised a workforce of 235 employees as of 31st March, 2024.

- Promoter and Promoter Group: 57.25%
- Foreign Institutional Investors (FIIs): 1.39%

THE LAST THREE YEARS...

The transformation of **Lloyds Engineering** was carried out across every dimension of the company's presence

The last three years have been the most transformational at Lloyds Engineering.

The company embarked on a number of initiatives with the objective to transform its DNA.

This was done to not just create a new business direction but to transform the company's personality.

This was done to not just enhance one-off profitability but to create long-term sustainability.

This was done to not just enhance our competitiveness but to transform our brand.

TRANSFORMING OUR DNA

We strengthened every business segment in line with the needs of a modern world

Corporate governance and leadership

Strengthened leadership; strengthened governance practices

Focused on enhancing stakeholder transparency and accountability

Capitalised the Balance Sheet

Implemented a rights issue and issued warrants to promoters

Created a business model that catalysed business growth without mobilising to debt

Enhanced manufacturing infrastructure

Doubled our work floor area

Research and development

Entered into a collaboration with a Japanese company to manufacture around 70-80% loading arm components in India

Acquired the exclusive rights to manufacture and market

acid-free steel pickling technology in India.

Talent management

Introduced an employee stock ownership plan (ESOP) to align employee and corporate interests

Introduced variable pay linked to individual and team KPIs.

Bidding

Focused on securing contracts across capital-intensive sectors like oil and gas, power, steel, defence etc. by meeting technical and financial bidding criteria

Bid for more and larger projects

Sales footprint

Enhanced our presence within India; prepared to enter international markets.

Environmental compliance

Entered technology spaces that enhanced environment outcomes (acid-free pickling in the steel sector)

Client relationships and contracts

Managed client relationships through proactive contract management, ensuring profitable terms.

Supply chain and logistics

Implemented logistics strategies to enhance the delivery of complex machinery.

Re-engineered the supply chain to indigenise the products portfolio

Strengthened on-site fabrication, enhancing timeliness and cost management

Outcome

The Lloyds Engineering that has emerged is contemporary, competent and competitive

Directed to enhance responsibility, profitability and sustainability

Promoter strength: The company's promoters possess a multi-decade industry track record; they have promoted Lloyds Metals, likely to emerge as one of the fastest growing integrated steel companies in India

Specialised solutions: The company is engaged in the combination of two strategic priorities – customisation and solutionisation – that are likely to deepen the company's brand through product customisation

Debt-free: The company has no long-term or short-term debt, selecting to grow the business completely through net worth

Technology alliances: The company entered into business-strengthening alliances with global technology companies, widening its competence matrix

Quick delivery cycles: The company's focus on quick delivery projects have translated into quicker cash flows and enhanced project rotation, strengthening brand equity and profitability

Strong net worth: The company possessed Rs.41,119.81 Lakhs of net worth as on 31st March, 2024

High asset-turnover: The company generated Rs.8.11 from every rupee invested in gross block, indicating superior business selection and asset sweating

Growing automation: The company invested selectively in automation with the objective to enhance fabrication accuracy, timeliness and cost-effectiveness

Revenue broadbasing: The company broadbased revenues, moderating an excessive dependence on three verticals (hydrocarbons, marine and steel) as a percentage of revenues

Revenue gateway: The company deepened its presence in projects within multiple sectors that are expected to generate adjacent revenue opportunities

Superior margins: The company delivered an EBITDA margin higher than the sectorial average, strengthening cash flows and validating its business model

The Chairman's overview

The Lloyds Engineering that we are building will be different from legacy engineering companies

Overview

At Lloyds Engineering, we have often been asked: 'What is our vision for the company?'

At our company, we prefer to reply through our national prism: 'The vision of our nation is the vision of our company.'

If there is a reason why we have extended the vision of our country to the outlook of our company it is because both are connected. If India stands at the most exciting moment in its existence, it means, by extension, that Lloyds Engineering stands at the cusp of an unprecedented opportunity.

To comprehend the possibilities of what lies ahead for country and company, it would be necessary to understand where India is and where it expects to go. India is passing through a structural shift towards growth and modernisation. The country is placing its biggest capital spending bet on infrastructure creation. This is incentivising a number of existing infrastructure players to make unprecedented investments.

Vastness of opportunity

This indicates the vastness of the India infrastructure building opportunity. We are a sub-set of the India growth story; the country's economic direction provides us with the foundation, framework and fuel to grow faster than what we have achieved. If there is a growing consensus that in a 'China plus one' reality the world is turning to India as next economic engine, then this optimism cascades into opportunities for companies engaged in building this new India.

This India growth dimension will translate into faster economic growth than we have seen. During the current financial year, India expects to emerge as a USD 4 trn

Mukesh Gupta,
Chairman

economy; the country expects to add a quarter of the growth achieved in more than 75 years in just the next few years and emerge as a USD 10 trn economy in a decade.

This growth is likely to be driven by accelerated reforms, investments and industrialisation. This could translate into a number of Indian companies becoming service and product providers to the world; this could translate into a number of Indian companies graduating to global scale; this could translate into a number of Indian companies leveraging the power of cutting-edge technologies to emerge among the fastest growing.

Our objective

It is with this perspective that we acquired management control of Lloyds Engineering a few years ago and embarked on initiatives to transform the company. The objective was not merely to strengthen; the objective was to reinvent. The objective was not merely to grow; the objective was to accelerate.

If we pitched any lower, we would have been doing the country, sector and ourselves a disservice.

This big picture was important. At a time when we felt that the India was being built larger and stronger, the country's principal requirement was the creation of engineering companies that would accelerate nation building. These companies would not only build bigger and better for the country; these companies would build faster and more competitively. More importantly, these engineering companies would help in the creation of a globally competitive India.

I am pleased to communicate that we are engaged in building just this kind of company. The Lloyds Engineering that we are building will be different from legacy engineering companies; our company is being positioned as a customised engineering solutions company dedicated to the exercise of building for India and building in India.

Priorities

These are the priorities of a reinvigorated and reinvented Lloyds Engineering.

One, we will enter relatively under-crowded spaces of large sectors, making it possible for us to capitalise on the growth of that sector without attracting margins-eroding competition.

Two, we will focus on the engineering cum fabrication of products being imported into India. We will examine how these spaces need products that are more environment friendly. We will explore how technology-intensive products being imported need to be indigenised. Through progressive cost rationalisation and indigenisation, we not only expect to emerge as more competitive than the landed cost of such products, but we expect to reverse the flow of such products, making it possible to leverage our competitiveness – national and corporate - and export our services across the world.

Three, we will enter sunrise spaces within large and mature sectors. We will enter into technology alliances with global leaders and progressively introduce new products into India. We believe that a focus on these priorities will not only perpetually widen our products portfolio but also keep increasing our order book. This will strengthen revenues on the one hand and enhance profitability on the other.

Four, we enjoy a longstanding presence in the steel, oil and gas and defence sectors. We will seek to enter new industrial sectors, including the potentially lucrative nuclear sector. In line with this projected growth, we expect to double production capacity across the foreseeable future.

Five, we are inducting subject matter experts and engineering professionals with the objective to build one of the most knowledge specialised engineering companies within the areas of our presence. Three years ago, the company comprised 1,115 person-years

of professional experience; by the close of the last year, this had grown to 1,445 person-years of experience across a range of sectors. The result is that the company broad-based its knowledge mix, deepened the richness of experience and, in doing so, has created the foundation of multi-year outperformance. The company is rewarding all its employees with a stock option plan, aligning corporate and personal interests on the one hand, and helping secure knowledge retention on the other.

At Lloyds Engineering, we believe that the ferment of these realities will translate into larger opportunities for our companies. Virtually every core sector that we are present in is expanding; we seek to address the opportunities coming out of these sectors with differentiated high-margin products; we will keep growing our portfolio through technology alliances; we will leverage the combined value of engineering cum fabrication in niche areas that makes us a customised integrated solutions provider; we will reinvest our surpluses and grow the business through net worth.

In view of these realities, we are optimistic that we are attractively placed to enhance value for all our stakeholders in a sustainable way across the long-term.

Mukesh Gupta, *Chairman*

Chief Financial Officer's performance overview

A financial perspective into our business

How we maintained business growth in FY 24 and created a new foundation

Big picture: The big picture message is that Lloyds Engineering balanced its business momentum and created a new foundation that will empower the company towards the next growth phase. The last financial year presented cash flow management and capital allocation priorities, any under-delivery in which could have had timely project completion and profitability implications. The fact that the company could report revenue growth of 99.69%, EBITDA growth of 86.82%, PAT growth of 116.82% and win new contracts (that grew its order book), indicated its overarching competence in addressing stakeholder needs for the moment and the future.

Order book: The principal challenge that the company faced during the year under review was the need to bag more orders through a prudent leverage of its credentials. This challenge was accentuated by the fact that the Indian government announced the largest infrastructure building outlay in the previous two Union Budgets (2022-23 and 2023-24), indicating that the growth of this country would now be driven by proactive infrastructure expansion. In this environment, there was a priority to be growth-ready through credentials,

effective project bidding and timely projects completion.

During the last financial year, your company seeded its growth foundation to graduate to the next level. At the start of the year under review, your company possessed an order book of Rs. 68,294.28 Lakhs; during the year under review, your company added Rs.84,561.28 Lakhs in orders and finished the year with a pending order book of Rs.90,431.95 Lakhs.

This order book crossed Rs.90,000 Lakhs for the first time, enhancing respect for the company among

select engineering companies, which translated into a better perception among stakeholders. This order book is to be liquidated in 12 to 15 months. As a matter of prudence, the company maintained an order book-to-revenue ratio of 1.45 times, protecting it from the prospect of over-burdening and under-delivery. Around 41.78% of the order book comprised orders for the steel vertical.

As a bidding discipline, the company bid for projects around an EBITDA margin of 17-18%.

Year	FY22	FY23	FY24
Order book (Rs. in Lakhs)	37,715.85	68,294.28	90,431.95

Profitable growth: The validation of the company's business model was derived from profitable growth across the last three years. Each time the company scaled revenues, it generated a superior amortisation of fixed expenses, widening margins. In view of this, the company's revenue growth now translates into a higher rate of profit accretion.

Year	FY22	FY23	FY24
Revenue growth %	-28.49%	524.01%	99.69%
EBITDA growth %	372.89%	301.31%	86.82%

Capital efficiency: The Company reported credible profitability during the year under review. EBITDA margin stood at 17.17% , which was a reflection of an improvement in volumes, economies, working capital management and sizable equipment ownership. Return on Capital Employed stood at 22.12%; RoE stood at 26.32%.

The overall improvement in the health of the business was due to long-term priorities: presence in niche areas relatively insulated the company from rampant competition, enforced fabrication competence, strengthened economies of scale through larger contract sizes (and hence larger procurement economies), prompted rising equipment investments that generated superior efficiencies and reinforced disciplined working capital management.

Margins: Through a prudent combination of volume-based economies, resource management efficiency and activity-based costing, the company strengthened its position as one of the most competitive within customised engineering solution companies in India. The company developed two working plots to enhance processing capacity. The company increased on-site fabrication during the year under review, moderating costs and accelerating projects completion. The increase in employment (163 at the close of FY 23 rising to 235 at the close of FY 24) temporarily increased costs while the outcomes will be visible through enhanced revenues and superior project outcomes from FY 25 onwards.

RoE stood at
26.32%

The company strengthened working capital hygiene and its receivables cycle through better terms of trade with principals, addressing project milestones with speed and embracing challenging projects that remunerated better

Kalpesh Prakash Agrawal
Chief Financial Officer

Year	FY22	FY23	FY24
EBITDA margin %	24.17%	18.23%	17.17%

Revenues: The company grew revenues 1,146.06% in FY 24 and 524.01% in FY 23 over the level of FY22. This sharp growth was the outcome of a complete rethinking of the company's business model. The company seeks to leverage its specialised engineering capabilities and broadbase its projects mix and revenues mix. The company intends to deepen its business in steel cum eco-pickling, theme-based construction, boilers, marine transfers and navy projects. This broad basing will empower the company to respond to growing pan-infrastructure opportunities, progressively protecting the company from an excessive dependence on any one vertical and providing it with a well-rounded engineering company personality. The company is positioned as a pan-India customised engineering solutions company.

The company monetised several projects during the last financial year, generating Rs.62,423.61 Lakhs in revenues. This cash inflow helped the company mobilise resources for reinvesting in its order book, ensuring that its large projects were adequately capitalised for timely completion.

Liquidity: As a policy, the management at Lloyds Engineering maximised the use of accruals in business growth. Working capital as a proportion of the total employed capital was 69.95% in FY 2022-2023 and 59.70% in FY 2023-2024; the proportion of inventory in the working capital outlay was 67.76% and 36.19% respectively. The working capital tenure reduced from 197 days of turnover equivalent in FY 2022-23 to 165 days in FY 2023-24.

The company's receivables were 88 days of turnover equivalent during the year under review. By selecting to moderate inventory and the receivables cycle, the company increased working capital turns – from 1.85 in FY 23 to 2.21 in FY 24. The company strengthened working capital hygiene and its receivables cycle through better terms of trade with principals, addressing project milestones with speed and embracing challenging projects that remunerated better.

The company worked with a debt-free Balance Sheet, marked by adequate cash in hand. The Company focussed on strengthening terms of trade, leveraging cash in hand to generate raw material procurement discounts and addressing fresh capital expenditure needs. As a matter of prudence, the company worked with credible customers that protected it from a payments default.

Year	FY22	FY23	FY24
Working capital as % of total capital employed	84.52	69.95	59.70

As on 31 st March	FY22	FY23	FY24
Cash and cash equivalents (Rs. in Lakhs)	2,459.40	798.66	12,497.13

Raw materials procurement: The Company is engaged in a business marked by fluctuations in raw material costs on the one hand and a commitment to provide completed projects at a focused cost. This makes it imperative for the company to take a forward call on commodity price movements, negotiate volume-based documents with

material providers, work with specialised material providers and book materials in advance at a low cost using the cash on books. During the year under review, the company moderated raw material costs as a proportion of revenues from 60.19% to 59.16%. The company entered into alliances with technology leaders that will make it possible to fabricate

once-imported equipment within India, enhancing indigenisation and moderating costs. The company entered into a technology alliance with TB Niigata in the marine transfers business, which will empower the company to enhance loading arms indigenisation to around 70-80%

Year	FY22	FY23

Way forward: The company enjoyed a strong financial position at the end of the fiscal year under review. The company's net worth stood at Rs.41,119.81 Lakhs as on 31st March, 2024. The company's large net worth was the outcome of a

build-up of surpluses. In an unpredictable world, this significant net worth bias implies relative de-risking; it provides the company patient and resilient capital in challenging periods. The company seeks to grow revenues in a calibrated manner

over the next three years. The company is aligned to grow its business around a relatively asset-light approach.

At the start of the year under review, your company possessed an order book of Rs.68,294.28 Lakhs; during the year under review, your company added Rs.84,561.28 Lakhs in new orders and finished the year with a pending order book of Rs.90,431.95 Lakhs

Our businesses

Overview

The complement of business segments where Lloyds Engineering is present has been prudently selected with the objective to generate a sustainable competitive advantage.

While on the one hand, these segments belong to large sectors, they stand for niche competencies – the best of both worlds, where the company enjoys a large revenue headroom complemented by superior margins.

These spaces will be increasingly relevant at a time when each of the sectors of the company's presence will keep growing.

The characteristics of the segments of our presence

Niche specialised engineering spaces

Beyond commodity market pulls

Relatively under-crowded spaces

Affording superior margins

Protected in some cases by technology alliances

Attractive growth prospects

How we intend to enhance value from these niche spaces

Reinforce the company's brand around customisation and differentiation

Generate superior, sustainable and consistent margins

Secured prospects in some cases through exclusive technology agreements for the India territory

Overview

The infrastructure and manufacturing industry growth in India is driving the growth of the steel business. As India industrialises, there will be a bigger urgency to plug the gap between the per capita steel consumption in India (estimated at ~90 Kg in FY 24) and the global average (~219 Kg). India is a net importer of steel. There is a larger drive towards indigenising steel grades; steel makers are gearing up for large investments with the Government's PLI scheme supporting this growth.

As the world looks towards a greener future, the Indian steel industry is taking initiatives to reach net carbon zero, warranting fresh investments.

All prospective investments shall have a larger localised share with respect to critical equipment and components, as

well as the engineering and manufacturing needed for setting up plants.

In view of the demand pull, India is likely to remain one of the fastest growing steel markets in the world. In this environment, steel companies will either expand or new companies will commission fresh capacity. This is expected to generate a growing appetite for specialised engineering competencies.

The company possesses the experience of having worked on a range of products locally and globally (iron ore processing plant components, iron making plant components, steel making plant components, casting & rolling plant components). The company expects to leverage this rich experience through the manufacture of adjacent products within the same sector and upgraded versions of World Steel Association existing products.

Competencies

Knowledge: The company possesses the competence to manage projects across the entire value chain, reinforcing its recall as a single-point solution provider.

Respect: The company has established a respect for the capacity to fabricate quality products used in steel sector.

Volumes and size: The company has established a competence in supplying equipment to manufacturers, coupled with the capability to manufacture large volumes

Capability: The company possesses the capability to deliver detailed engineering of customised equipment, strengthening its distinctiveness

Responsibility: The company assumes the single point turnkey responsibility of complete plant fabrication and delivery (DRI plants for instance), enhancing a customer's peace of mind

Flexibility: The company possesses the competence to engage in on-site fabrication (customer's premises), making it possible to shrink delivery timelines, quality and cost-effectiveness.

The capability to execute projects across different models like ESS, EPC, BOOT, TAAS, EPCM etc. shall help address Indian and global markets.

Outlook

The company is optimistic of prospects considering that India intends to grow its steel manufacturing capacity from around 140 mn tonnes to 300 mn tonnes by 2030, widening opportunities for customised engineering service providers. Within this growth space, there are a number of products that

are not being manufactured by the Indian steel sector; their engineering and manufacturing provide attractive indigenisation potential. Besides, India is one of select markets to possess upstream iron ore coupled with downstream steel manufacturing capacity and the world's most populous country seeking to consume more steel.

What our business head says

“India is poised at the cusp of a sharp growth in its steel sector. India provides an unusual instance of a country that is already the second largest steel producing country and yet extensively under-penetrated by per capita. The country's finished steel consumption is anticipated to increase to 230 MT by 2030-31 from 119.17 MT in FY23. Each of India's leading steel companies plan to deepen their investments in increasing steel capacity. This provides a widening landscape for specialised engineering companies like Lloyds Engineering that provide services to this growing sector. Besides, the eco-pickling technology represents a giant leap for the steel industry as a whole, deepening its commitment to sustainable steel processing.”

Case study

The company addressed an overseas project supplied to one of the Russia's largest companies called Ural Mash in Ekaterinburg.

The steel plant was designed for the first time in India by the technology provider at -40 degrees centigrade.

Lloyds Engineering manufactured and supplied all critical components like water cooled parts etc. for the electric arc furnace-based steel making plant well within the contractual deliveries with the highest quality.

Eco-pickling and Lloyds Engineering

At Lloyds Engineering, we seek to be recognised among the most responsible specialised engineering companies in India.

This positioning was validated during the last financial year when the company entered the increasingly relevant eco-pickling space.

Eco-pickling is a sunrise concept in the global flat steel sector. It is a new environmentally advantageous method of removing the oxide layer (scale) formed during the hot rolling process of producing flat rolled steel. EPS accomplishes mechanical removal of scale using a unique 'slurry blast' technology, in which a mixture of carrier liquid (water) and abrasive material impinges against the moving strip of steel. The force, angle and uniformity of slurry impact against the steel strip are precisely controlled to achieve complete scale removal, with no meaningful erosion of the steel substrate.

The company entered into an agreement with The Material works Limited (TMW) that was exclusive to India and Bangladesh.

The prospects of eco-pickling are relevant to a growing need among steel markets to be increasingly responsible in manufacturing processes; there are 150 pickling lines in the country that could be potentially replaced by eco-pickling.

The company is engaged in the process to manufacture a pilot manufacturing facility that validates the company's proposition.

The Eco Pickled Surface (EPS) process that replaces acid pickling by fully removing the mill scale from hot rolled black and imparting a clean, rust-resistant surface that is optimised for painting. It uses no acid but just ordinary water and fine steel; it generates with no harmful waste products.

Overview

The boiler, a crucial steam generation unit, plays an essential role in process industries like refineries, petrochemicals, fertilisers, chemicals and textiles. Its primary application is in thermal plants for power generation. The boiler represents the heart of the power plant, influencing its efficiency. Given India's rich fossil fuel reserves, the growth potential for this segment appears assured across the foreseeable future.

In India, the government's focus has shifted towards utilising renewable energy sources such as solar, wind, hydro and waste heat recovery for power generation, moving away from traditional fossil fuels.

However, the generation and use of thermal power in the steel industry are likely to sustain, linking the fortunes of the boiler business with domestic steel production. The country's steel product is expected to grow from approximately 150 MTPA to 300 MTPA by 2030, driven by infrastructure sector demand; direct reduced iron (DRI) production is expected to constitute around 35% of this growth, driving the growth of the boiler market.

In India, DRI kiln-based steel production units are dependent on the integration of waste heat recovery boilers and power plants that utilise the waste heat generated from kilns. This scenario presents an

opportunity for waste heat recovery boilers and power plants within the steel sector.

Substantial opportunities for boilers could be derived from the growth of the hydrocarbons, refineries, petrochemicals, fertilisers, chemicals, cement and textile industries, widening the market for boiler manufacturers.

Lloyds Engineering enjoys a long-standing reputation for reliability, underpinned by validated capabilities. The company's competitive advantage is reinforced through extensive knowledge, experience, and a proven track record in delivering a diverse range of boilers for prominent companies.

Our competencies

Focus: The business was spun off into a full-fledged vertical, enhancing focus and specialisation.

Competencies: The business possesses a range of competencies (marketing, design, engineering, execution, procurement and multiple sites engagement) that makes it a single-point solution provider.

Investment: The company invested in cutting-edge boiler fabrication

equipment (augmented automated 8 torch panel welding line and CNC tube bending machine) that enhanced its capability to address complex orders.

Broadbasing: The company extended its boiler capabilities from a longstanding presence in the hydrocarbons sector to the steel sector (multiple segments within including kilns for DRI plants).

Fabrication: The company possesses validated competencies in

the fabrication of large and complex boilers.

Knowledge: The company drawn on the rich experience of its promoters who are engaged in mining and steel manufacturing in another business, widening boiler fabrication opportunities.

Complement: The company possesses a flexibility to insource and outsource, making it an effective one-stop solution provider.

Key aspects, FY24

- The company nearly doubled its order book to Rs.35,724.54 Lakhs by the year end.
- Our product lineup comprised Atmospheric Fluidised Bed Combustion Boilers (AFBC) and Circulating Fluidised Bed Combustion Boilers (CFBC), respected for their energy efficiency.
- CFBC Boilers can efficiently burn Dolochar, a by-product generated from kilns, accounting for approximately 30% of kiln output.
- Significant investments were made in modern infrastructure to address client expectations.
- The company installed an 8-torch panel process welding machine
- The company acquired a CNC tube bending machine and PLC-controlled tube bending machine
- The company established a new fabrication shed (15 meters in height) under the crane hook
- The company modernised existing equipment to improve efficiency and output
- The company enhanced production capacity by over 125% through the strategic acquisition and leasing of manufacturing units.

Outlook

The prospects of the business appear optimistic for various reasons.

The projected growth of the Indian infrastructure sector (following increasing Budget allocations by the government) will warrant increased steelmaking. India has projected an increase in steel

manufacturing capacity from 150 mn tonnes to 300 mn tonnes by 2030, widening the market for customised boilers.

There is a growing need for waste heat recovery boilers customised around the need of steel plants, reducing carbon footprint. This is an area that the company possesses a competence in.

There is a growing boiler retrofit market – legacy boilers upgraded without being scrapped - that can be addressed by the company.

In view of these prospects and the company's growing focus on the space, the business seeks to emerge as the top three in India across the foreseeable future.

The country's steel product is expected to grow from approximately 135 MTPA to 300 MTPA by 2030, driven by infrastructure sector demand; direct reduced iron (DRI) production is expected to constitute around 35% of this growth, driving the growth of the boiler market

What our business head says

“India has committed to become net zero by 2070. During this period, the companies will continue to enhance their thermal power capacity to address growing consumption and base load requirement. This indicates a growing demand for boilers used in the power sector and specialised engineering solution providers possessing this competence. At Lloyds Engineering, we possess decades of related engineering experience; the company is at the right place and right time to capitalise on this growing trend.”

Overview

The country's hydrocarbon segment is capital-intensive, providing room for hundreds of specialised vendors across a range of products. Most of the country's refineries and petrochemical complexes are in a state of perpetual capital-intensive modernisation, creating perennial and non-seasonal revenue opportunities.

Hydrocarbons will be required in growing quantities in an increasingly industrialised India.

The promoters of the company have been engaged in this vertical for 50 years, having developed knowledge capital in products, processes and services. The company has been empaneled as a prospective vendor by virtually every large petroleum and petrochemical company. The company has developed a competence in the delivery of products and services that are first-time right, deepening its sectorial respect as a service provider that can be trusted.

Optimism

There is a greater need for enhanced machining manufacturing capabilities, making a competent company like Lloyds Engineering increasingly relevant.

The company will continue to focus on the fabrication of products that are sophisticated and value-added, strengthening margins.

The company invested in manufacturing infrastructure and equipment (tube sheet drilling machine) to enhance capability.

The company invested in talent recruitment, retention and training to widen its portfolio of competencies.

Outlook

Most petroleum and petrochemical companies in India are engaged in modernisation and expansion programs, creating new engagement opportunities

for focused service providers like Lloyds Engineering. There is no dearth of opportunities in this sector for focused knowledge-driven engineering companies, creating attractive prospects for Lloyds Engineering.

Our competencies

Knowledge capital: The promoter possesses the rich experience of five decades in this segment, having seen technologies evolve, keeping itself relevant across every phase through a range of projects (more than 100 in number)

Brand: The company possesses a distinctive brand recall of a solution provider, marked by projects delivered on schedule and first time right – a superior cost-value proposition for customers

Competence: The company developed competencies in Process Packages & Static Equipment (pressure vessels, heat exchangers, columns, reactors and other critical equipment and air gas dryers). The Company possesses a competence in executing ODC Columns involving shop fabrication and site joining.

Capability: The company possesses specialised engineering capabilities that enhance its strategic differentiation. For instance, the company possesses a CNC Tubesheet Drilling Machine that can drill upto 1,000 mm thick tubesheet, which facilitates the execution of large and heavy heat exchangers, strengthening its respect beyond the generic.

Relationships: The company possesses active relationships with all Indian hydrocarbon giants, strengthening its credentials to address their new projects

The company has developed a competence in the delivery of products and services that are first-time right, deepening its sectorial respect as a service provider that can be trusted.

What our business head says

“India’s economic growth is closely related to its energy demand, therefore, the need for oil and gas is projected to increase. The outlook for the hydrocarbons sector in India continues to be optimistic. Oil demand in India is projected to register a 2x growth to reach 11 million barrels per day by 2045. Diesel demand in India is expected to double to 163 MT by 2029-30, with diesel and gasoline covering 58% of India’s oil demand by 2045. The industry is expected to attract USD 25 billion investment in exploration and production. India is already a refining hub with 23 refineries, and expansion is planned for tapping foreign investment in export-oriented infrastructure, including product pipelines and export terminals. India aims to increase its refining capacity from 266.5 MMTPA to 450 MMTPA by 2030. This should widen the demand for engineering services related to the hydrocarbons sector.”

Overview

This business comprises products and components manufactured for the Indian navy. This is a specialised space that needs to account for marine realities, customising products around saline influences, corrosion resistance and rolling sea conditions. This warrants a specialised insight into the navy's specific requirements.

The potential of this business is undergoing a substantial shift following the announcement by the Indian navy to supplement and replace its existing fleet seafaring and coastguard fleet.

A substantial number of vessels are expected to be added in the existing fleet in the coming decade, creating a disproportionate opportunity for specialised engineering companies focused on its space.

Lloyds Engineering is attractively placed to build on its established competence in the supply of critical vessels products like electro-hydraulic steering gear and fin stabilisers (vessel stabilisers in rough weather). The company is among a handful of large specialised engineering service providers.

Competencies

Experience: The company possesses more than 35 years of experience of providing products for the Indian Navy

Complement: The company provides products, backed by the delivery of spares and services, transforming a one-off transaction into an annuity engagement

Competence: This segment has a limited share in the company's overall revenue. However, the company aims to generate a large proportion of its revenues from precision value-added products and components

Capability: The company comprises a demonstrated capability in the development of products with counter-obsolescence capability, providing customers overall satisfaction.

Empanelment: The company has been empanelled as a registered vendor with the Indian Navy and shipyards.

Portfolio: The company has widened its portfolio within this space by capitalising on engineering synergies.

What our business head says

“We are optimistic of the prospects of the Indian naval sector. To counter the growing presence of the Chinese in the Indian Ocean region, the Indian Navy placed orders for 68 warships and vessels worth approximately Rs.2,00,000 crore to strengthen its blue-water force. The orders include next-generation corvettes, submarines, survey vessels, and multi-purpose vessels. The Navy aims to achieve a force level of 155-160 warships by 2030, with a long-term goal of 175-200 warships by 2035. Lloyds Engineering will select to work on those products, enter into technology alliances (if needed) to indigenise them and carve out a relatively protected share of growing coming out of the sector.”

Overview

There is a growing Indian premium on the capacity to move to clean fuels, a large proportion of which may need to be imported. The import of these clean fuels warrants material transfers (loading and unloading) through the deployment of electro-hydraulic systems that enhance transfer stability – from tanker or ship to the port and vice versa. These systems ensure that the gas or liquid is transferred without a compromise on throughput speed or safety.

Lloyds Engineering has established a competence in the manufacture of

material transfer systems that makes it possible for its customers to deal in a range of fuels and materials (ammonia, petrochemicals, acids, oils and crude oil). The effectiveness of the company's solutions makes it possible for ports to enhance throughput, revenue and a reputation for safety. In view of this, the success of the company's specialised engineering products are linked to port effectiveness. In view of the aggressive port growth in the country and a movement towards clean fuels, the company is placed in the right place at the right time.

Outlook

The company is optimistic of the growth of this niche. An increase in the number of active ports (major and minor) has increased the room for liquid and gas imports into India.

Besides, with the India growth story picking up with a corresponding growth in the national appetite for fuels, there will be a bigger premium on timely imports, widening the relevance of material transfers.

Competencies

Niche: The company has selected to be present in a relatively under-explored niche protected from cut-throat competition

Technology: The company possesses the capability to manufacture swivel joints for small truck/rail loading arms as well as marine loading arms

Technical alliance: The company entered into a technology alliance with TBG Niigata, a Japanese technology company for access to specialised knowhow.

Indigenisation: The company plans to progressively indigenise the components of imported origin (more than 70%).

Testing: The company is in the process of manufacturing marine loading / unloading arm with in-house testing capabilities.

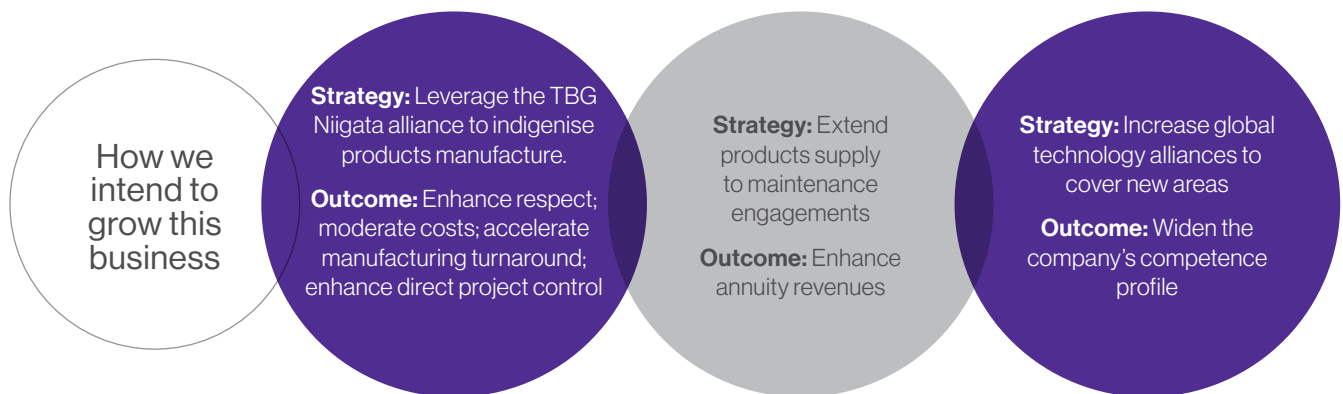

TBG Niigata

TB Global Technologies Ltd. (TBG) was established through the merger of Tokyo Boeki Machinery Ltd. that supplies equipment required for loading and unloading of petroleum products, chemicals, gases and liquefied natural gas etc. , including after sales services and Tokyo Boeki Engineering Ltd. that provides the development and manufacturing of the above-mentioned products.

The product portfolio consists of energy-related machinery and equipment, including loading arms and swivel joints, which are fluid handling devices indispensable for the distribution of energy resources.

The company supplies the 'loading arm', which accounts for the largest share of the Japanese market with an extensive track record in global sales, along with other energy related products to their valuable customers. TB Global Technologies will continue to be instrumental in the energy supply chain.

What our business head says

“India is the world’s fourth largest importer of liquefied natural gas. This demand is expected to grow 4.9% annually between 2022 and 2050. India’s net natural gas imports could grow faster than domestic production, increasing from 3.6 billion cubic feet per day (Bcf/d) in 2022 to 13.7 (Bcf/d) in 2050. This will widen the demand for port infrastructure that makes it possible to transfer gas and liquids with stability and security. Lloyds Engineering expects to capitalise on this phenomenon through the engineering of niche products that facilitate these transfers for the benefit of refineries.”

Business segment

Our theme-based construction business

At Lloyds Engineering, we have taken a long-term view of this business, investing infrastructure and knowledge capital. The company possesses a track record of completed projects that are likely to validate its credentials

Overview

There is a growing need for urban India to look better, enhancing life quality for visitors and residents. The need for better urban presentability warrants an investment in robust infrastructure on the one hand, coupled with enhanced aesthetics and conveniences. There is a growing recognition that the complement of these requirements warrants a completely different way

of approaching urban regeneration. This differentiated need is likely to be increasingly plugged by the theme-based construction niche.

At Lloyds Engineering, we have taken a long-term view of this business, investing infrastructure and knowledge capital. The company possesses a track record of completed projects that are likely to validate its credentials.

Competencies

Knowledge: The company possesses technology knowledge and experienced professionals

Association: The company has associated with prominent service providers beyond the core focus, widening it's solution capability

Demonstrated: The company possesses a demonstrated capability in the commissioning and completion of go theme-based construction projects

Acceptance: The delivered project were received well by the customer and public

Balance: The company possesses the competence to fuse different architectural dimensions – technology, art and culture - into a curated end project that enhances citizen pride

Outlook

The company expects to leverage its competence and first-mover advantage to build a larger visibility for the concept across urban India. The company expects to capitalise on the

fact that not only are municipal budgets growing but also accounting for a larger provision for aesthetics. By the virtue of being able to provide a robust infrastructure cum relevant aesthetic solution, the company expects to grow this business with speed.

Spirit of Mumbai clock tower at Mahim Bandra Junction

Mumbai is the largest Indian metropolis. To celebrate the Spirit of the Mumbaikar and showcase this spirit, there was a

growing need for a Spirit of Mumbai Monument.

The company is engaged in development of this tower that has emerged as one of Mumbai's prominent landmarks.

Beautification of Sarkhel Kanhoji Angre Samadhi & Udyan

Sarkhel Kanhoji Angre or Sarkhel Angre was the first notable chief of the Maratha Navy in 18th century India. He fought against the British, Dutch, and Portuguese. Despite the attempts of all these foreign powers, he remained undefeated.

This final resting place of Kanhoji Angre is a seemingly dilapidated fort that is

still a tourist magnet. It is an eight-faced structure with carvings on pillars.

Built on a black basalt platform, the main chhatri reflects the elegance of the Maratha style architecture.

As a part of the beautification project conducted by the company, the Udyan compound wall shall be built to look like fort walls; the main entry side compound wall and gate have been designed to look like an ancient ship constructed in FRP and structural steel.

Atal Smruti Udyan

The Interior of this unique park is renovated and upgraded with state-of-the-art technology and softwares by the company.

At the entrance of this park is Democracy Hall where the Constitution of India can be seen in a digital form. A hall sheds light on the life of the late Prime Minister Atal Bihari Vajpayee with a full-length oil portrait, realised through projection mapping.

The location comprises details of his life and workplace. A sculpture evokes memories of the Partition of India and mural depicting the first election and Lok Sabha, among other moments from Indian history and the life of Mr. Vajpayee (through the hologram).

Atal Smriti Udyan also has a well-equipped library. In this library one can enjoy the books written by Hon'ble Atal Bihari Vajpayee along with about 25,000 books on other important subjects.

What our business head says

“There is a growing recognition that the quality of urban infrastructure is a potent feel-good factor. This enhances urban pride, population retention, enhanced investments and stronger livelihoods. The result is that India's Budget 2023-24 allocated Rs.764.32 billion for urban renewal. An Urban Infrastructure Development Fund (UIDF) will be established for supporting public agencies in strengthening infrastructure in tier 2 and tier 3 cities. It is expected that Rs.100 billion per annum will be made available for project implementation. At Lloyds Engineering, we are addressing a unique combination of urban infrastructure engineering services coupled with aesthetic renewal, enhancing citizen pride and footfalls. The company possesses a track record of having successfully transformed urban Mumbai pockets, creating a showcase for follow-on projects across the country.”

Excellence driver

Talent management at Lloyds Engineering

**Overview**

At Lloyds Engineering, we are a reinvented organisation following the new management assuming control in the last few years. The new management has infused a sense of purpose, investment, recruitment, skill renewal and performance

delivery. The result is that in the short space of three years, Lloyd's Engineering has emerged as one of the fastest growing engineering companies in India.

The new sense of purpose has translated into accelerated recruitment, filling managerial gaps with corresponding talent

and creating a future-facing organisation in line with the company's existing order book, desired direction and aspired scale. The result is that the company is in the process of deepening its desired culture with the objective of emerging as one of India's fastest growing, most respected and differentiated engineering companies.

Our HR policy

The company's overarching policy to maximise talent effectiveness ensures that employees are in roles where they can perform their best, aligning capabilities with strategic organisational needs. This policy includes the following key practices:

Right person, right role: Assign employees to positions that match their skills and strengths, ensuring role suitability.

Talent alignment with strategy: Align talent management practices with the company's strategic objectives, ensuring that the workforce is equipped to meet existing and emerging challenges.

Talent acquisition and retention: Attracting and keeping skilled employees who align with the company's culture and values.

Performance management: Implementing annual systems to evaluate and improve employee performance.

Semi-annual incentives: Providing substantial incentives every six months based on performance evaluations.

Learning & development: Offering continuous learning opportunities and career development programs to help employees grow and adapt.

Employee engagement & satisfaction: Fostering a positive work environment where employees feel valued, motivated, and engaged.

Diversity & inclusion: Promoting a diverse and inclusive workplace where all employees enjoy access to equal opportunities.

Compensation and benefits: Offering competitive compensation packages and benefits to attract and retain top talent.

ESOP: Providing Employee Stock Option Plans to confirmed employees as a retention tool.

Compliance & ethics: Ensuring all HR practices comply with legal standards and ethical guidelines.

Our Human Resources goal

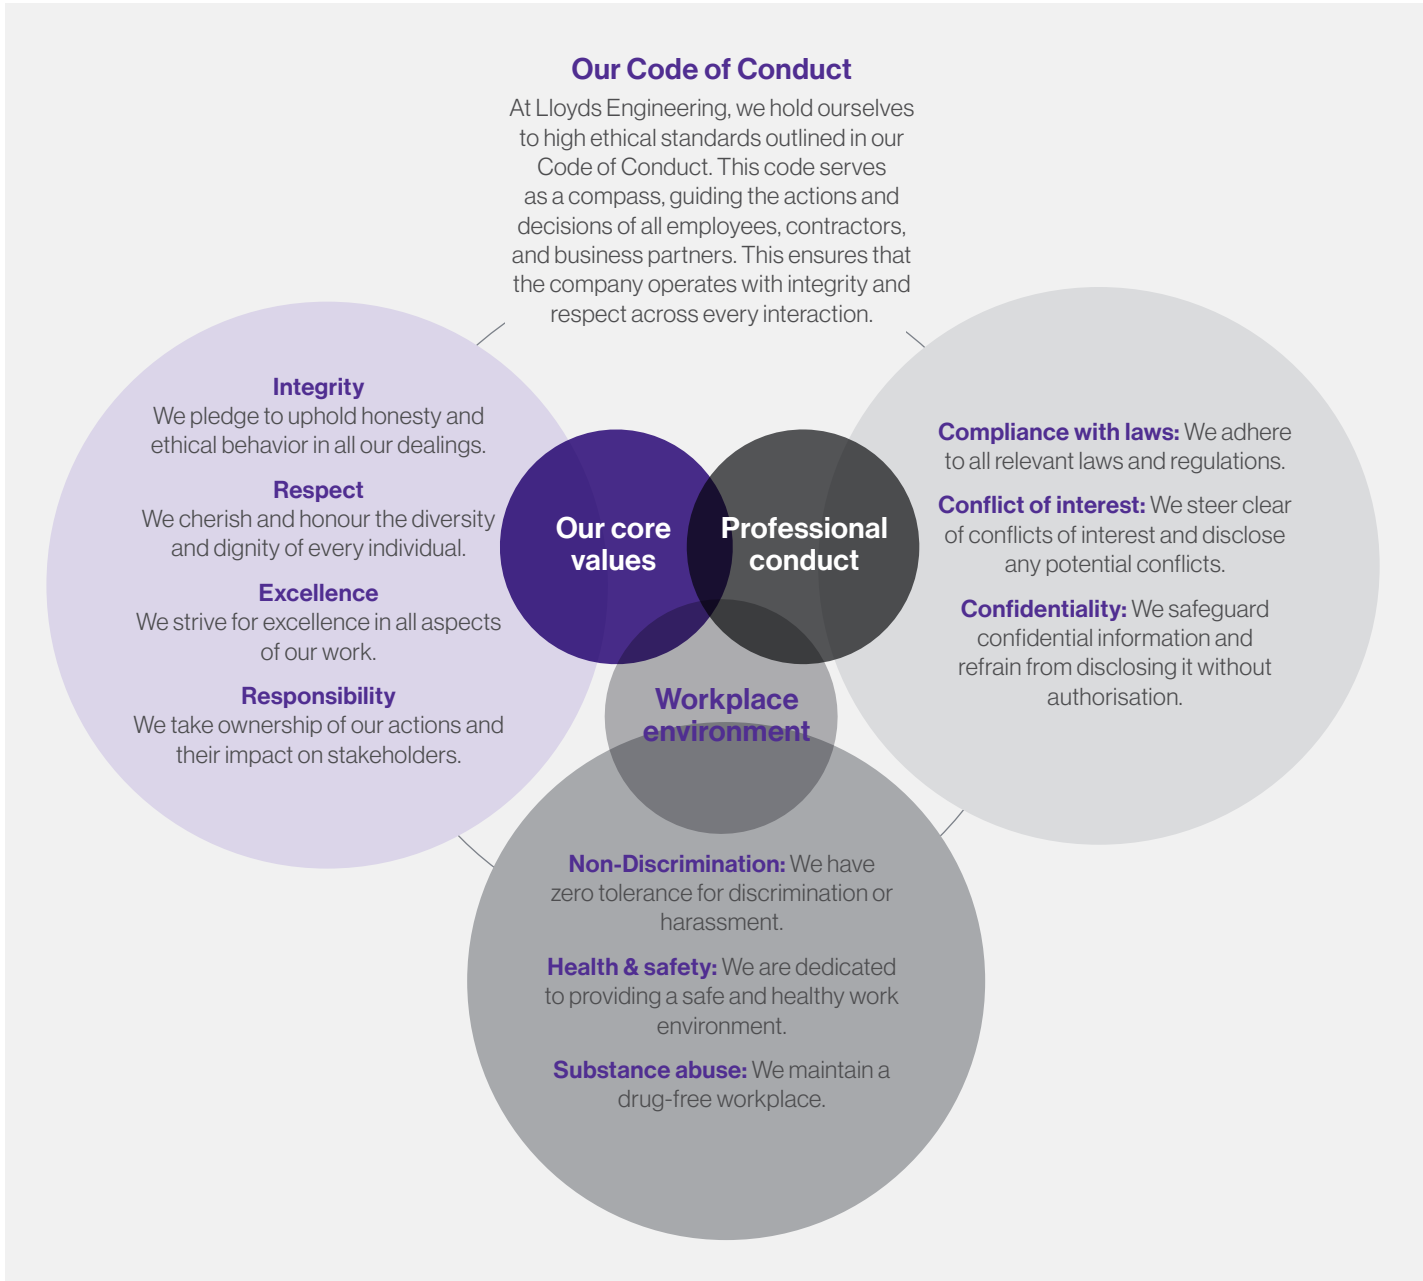

The Human Resources goal of the company is to ensure that the workforce is aligned with the organisation's strategic objectives, creating an environment where employees can excel, grow skills, stay engaged and committed to the company's mission. This comprises the following priorities:

Maximising talent effectiveness: Placing employees in roles aligned with their competencies and supporting the company's goals.

Enhancing employee capabilities: Developing employee skills to address existing and emerging business needs.

Strategic alignment: Ensuring HR practices align with the company's strategy to prepare the workforce for achieving business objectives.

HR practices for enhanced our talent effectiveness

To maximise talent effectiveness and align the workforce with the company’s strategic objectives, the organisation follows key HR practices:

Strategic workforce planning

- Analyse current and future workforce needs based on business goals.
- Identify skill gaps and develop plans to address them
- Ensure a talent pipeline to address emerging needs

Comprehensive recruitment & selection

- Develop targeted recruitment strategies to attract diverse, high-quality candidates
- Use multiple recruitment channels, including job boards, social/professional media, and employee referrals
- Conduct thorough selection processes with structured interviews

Effective onboarding programmes

- Implement structured onboarding to acclimate new hires to company culture and operations
- Provide clear job roles, expectations, and initial training for a smooth transition

Performance management system

- Set unambiguous performance goals aligned with the company's objectives
- Conduct semi-annual performance reviews; provide actionable feedback
- Use performance metrics to identify high performers and improvement areas

Diversity, equity & inclusion

- Promote a diverse and inclusive workplace through targeted recruitment and development programs.
- Ensure equitable opportunities for all employees.
- Treat everyone as members, not just employees.

Health & well-being programmes

- Implement wellness programs to support physical and mental health.
- Offer attractive rewards for wellness challenges.
- Ensure a safe and healthy work environment.
- Provide Medclaim and accident insurance.
- Offer life after death benefits.

Semi-annual incentive plans

- Conduct structural reviews with clear job roles/key result areas
- Reward employees based on individual and departmental performance

Competitive compensation & benefits

- Offer market-competitive salaries and benefits packages.
- Conduct regular compensation reviews to stay competitive.
- Provide performance-based bonuses and incentives.
- Implement a salary structure that is friendly to employees and employers.
- Apply policies according to grade.

Legal compliance & ethical practices

- Ensure HR policies and practices comply with local, state, and federal laws.
- Promote ethical behavior and maintain a code of conduct.
- Implement a POSH (Prevention of Sexual Harassment) policy.

Employee engagement & retention initiatives

- Engage in organisational assessments like Great Place To Work to gauge pride of employee association with the company and identify improvement areas.
- Offer programs that promote work-life balance (flexible hours and attractive leave policies).
- Organise indoor and outdoor sports championships with rewards; celebrate festivals and special days.

Employee relations & communication

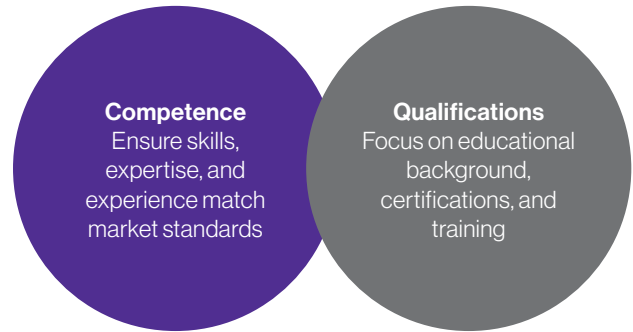

- Maintain open and transparent communication between management and staff.
- Address employee concerns and grievances promptly and fairly.
- Keep employees informed about company updates, policies, and changes through regular communications.
- Provide an anonymous suggestion box for employees to freely share their views and suggestions.

Strengthening employee skills at Lloyds Engineering

To effectively strengthen employee skills, Lloyds Engineering has implemented and is planning various training programs to ensure comprehensive development and continuous learning at all organisational levels. Our key initiatives include the following:

- Extensive onboarding training for new hires to acquaint them with company policies, culture, and specific job roles.
- Wellness training conducted by a renowned dietitian to promote employee well-being.
- Regular on-the-job training with proper mentoring from seniors for new joiners.

Strategies and outcomes

Challenges and its mitigation

There is a growing challenge in recruiting suitable candidates with necessary skills or experience

The Company widened its talent search through job portals and professional sites. It leveraged the social media, Group brand and employee testimonials to attract prospective candidates.

Increased competition from other recruiting companies for the same talent, offering higher salaries, benefits and work environments.

The company enhanced its value proposition by offering competitive compensation packages and creating a positive work culture. It encouraged existing employees to refer qualified candidates, offering incentives for successful hires.

Rapidly transforming job market dynamics, including a trend towards increased flexibility in employment arrangements.

The Company offered flexible work arrangements and emphasised work-life balance, and other perks to attract a wider candidate range.

Impact of HR Initiatives on corporate performance

The HR initiatives implemented during the financial year under review significantly contributed to improving Lloyds Engineering's corporate performance in several key areas.

Enhanced employee productivity:

The extensive training programs and continuous learning opportunities led to a notable increase in employee skill levels and competencies. This resulted in higher employee productivity. The revamped onboarding process helped new hires become productive quicker, reducing their productivity gestation.

Higher employee engagement & satisfaction:

Higher employee engagement and satisfaction were achieved. Feedback from the Great Place To Work survey indicated an increase in employee satisfaction. Initiatives addressing work-life balance, recognition, and development were particularly well-received. With improved engagement and satisfaction, the company experienced a decrease in employee turnover rates.

Retaining top talent helped maintain continuity and reduced the costs associated with hiring and training new employees.

Leadership & succession planning:

Leadership development and succession planning were strengthened through targeted programs, ensuring a robust pipeline of capable leaders ready to take on higher responsibilities. This strategic succession planning minimised disruptions during leadership transitions and maintained organisational stability.

Innovation & competitive edge:

The emphasis on innovation and creativity encouraged employees to think outside the box and contribute new ideas, helping the company stay competitive and responsive to market changes. This culture of innovation provided Lloyds Engineering with a significant competitive edge.

Operational efficiency & excellence:

Operational efficiency and excellence were enhanced through streamlined HR processes. The implementation of new HR systems and technology upgrades led

to more efficient HR processes, allowing HR to focus more on strategic initiatives rather than administrative tasks. The new performance management system facilitated more effective goal setting, feedback, and performance tracking, leading to improved overall employee performance and alignment with company objectives.

Diversity, equality & inclusion: The company's commitment to diversity, equity, and inclusion improved its reputation as an employer of choice, attracting top talent.

Financial performance: The financial performance saw a positive impact. Higher productivity, better leadership, and continuous innovation contributed to improved financial performance. Enhanced employee effectiveness translated into better service delivery and product quality, driving customer satisfaction and revenue growth. Additionally, reduced turnover rates and improved operational efficiency resulted in significant cost savings, contributing to the bottom line.

Building a learning organisation

To become a learning organisation, Lloyds Engineering implemented key initiatives that promoted continuous learning, knowledge sharing, and adaptability. These initiatives were designed to embed learning into the everyday practices of Lloyds Engineering. The primary initiatives included:

Comprehensive learning & development programmes: Lloyds Engineering conducted training sessions

covering a range of topics relevant to employees' roles and career aspirations.

Encouraging continuous improvement: Lloyds Engineering promoted continuous improvement in day-to-day work through proper mentoring from leaders, encouraging employees to identify and implement incremental changes that enhance efficiency and effectiveness.

Leadership & management development: Lloyds Engineering developed specialised programmes to

cultivate leadership skills at all levels, ensuring managers can support and foster a learning environment within their teams.

Feedback & reflective practices: Lloyds Engineering implemented a comprehensive feedback system where employees receive input from peers, subordinates, and supervisors, promoting self-awareness and continuous personal development.

Developing leaders at every level

Lloyds Engineering implemented created leaders at every level. These systems are designed to identify potential leaders, provide them with the necessary skills and opportunities for growth, and foster a culture of continuous leadership development. Key systems and initiatives include:

Performance management with 360-degree feedback: Lloyds Engineering has a comprehensive feedback system that allows employees to receive inputs from peers, subordinates, and supervisors,

helping identify leadership potential and improvement areas.

Succession planning: Lloyds Engineering prepares high-potential employees for leadership roles. This includes creating development plans and monitoring progress to ensure preparedness when leadership opportunities arise.

Talent identification: Lloyds Engineering identifies employees with leadership potential early in their careers and enrolls them in accelerated development programs focusing on leadership skills and strategic thinking.

Career development: Lloyds Engineering creates career paths that

outline the steps and competencies required for employees to advance to leadership positions, providing them with a development roadmap.

Delegation of authority: Lloyds Engineering encourages managers to delegate authority and responsibility to their team members, giving employees opportunities to lead projects, make decisions, and take ownership of their work.

Performance-based incentives: Lloyds links performance incentives to leadership behaviors and achievements, motivating employees to develop and exhibit leadership qualities.

Promoting work-life balance at Lloyds Engineering

Lloyds Engineering implemented various initiatives to promote a balanced lifestyle for its employees, recognising that a healthy work-life balance is essential for overall well-being, productivity, and job satisfaction. Here are some of the key initiatives aimed at helping employees achieve a balanced lifestyle:

Flexible working arrangements: Allowing employees to choose their working hours within a certain range,

enabling them to better accommodate personal commitments and preferences.

Health & wellness programmes: Providing access to wellness programs through the IMT Care Insurance Portal, including fitness classes and a Wellness Challenge Program to encourage employees to stay fit and healthy.

Work-life balance policies: Encouraging practices such as avoiding late sitting, offering flexible sandwich leave, allowing up to three late arrivals per month, and permitting early leave on

employees' birthdays and once a month for personal errands.

Supportive work environment: Providing indoor games that employees can enjoy during break hours with colleagues, fostering a supportive and relaxed work environment.

Family-friendly benefits: Offering six months of maternity leave and five days of paternity leave, which can be combined with other leaves to support employees' family needs.

Recruitment and retention success

During the last financial year, Lloyds Engineering increased headcount while retaining most of its workforce. The average age of employees remained steady at 36, consistent with the previous year.

The recruitment process at Lloyds is guided by stringent standards, ensuring that we hire the best talent. These standards include:

Educational qualifications and experience: Clear criteria for the qualifications and experience required for different roles.

Skills and competencies: Thorough evaluation of relevant skills and competencies during the hiring process.

Recruitment methods: Comprehensive methods, including interviews and background checks, to ensure we select the most suitable candidates.

Diversity and inclusion: Policies aimed at ensuring a balanced and fair recruitment process, promoting equal opportunities for all.

These metrics define our decisions on workforce planning, retention strategies, and recruitment practices, aligning our human resource strategies with Lloyds

Engineering's overall business objectives. Our commitment to equal opportunity recruitment is reflected in our diverse workforce, with active efforts to recruit individuals from various genders, ethnic backgrounds, and nationalities.

This diversity not only enriches our workplace culture but also brings a variety of perspectives and ideas, driving Lloyds' success and innovation. Our policy ensures that recruitment, hiring, and promotion processes are fair and based on merit, providing equal opportunities for all candidates. Currently, 7% of our workforce is women; this percentage is expected to increase.

Ensuring workplace safety

Safety policies & procedures: Lloyds Engineering established comprehensive policies outlining safety protocols, emergency procedures, and the responsibilities of both employees and management. Strict enforcement of safety gear usage is maintained within the workshop.

Training programmes: Regular training sessions conducted to ensure all employees are well-informed about safety practices and emergency procedures. Additionally, Lloyds Engineering actively participates in Safety Week Programs to enhance safety awareness.

Workplace inspections & audits: Routine inspections conducted to identify

and mitigate potential hazards within the workplace, ensuring a safe environment for all employees.

Incident reporting systems: Lloyds Engineering has clear procedures in place for reporting accidents, near misses, and unsafe conditions, allowing for prompt resolution and continuous improvement in safety standards.

- 28. Information and other instructions relating to e-voting are as under:**
- Pursuant to the provisions of Section 108 and other applicable provisions, if any, of the Companies Act, 2013 and the Companies (Management and Administration) Rules, 2014, as amended and Regulation 44 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, the Company is pleased to provide to its member's facility to exercise their right to vote on resolutions proposed to be passed in the Meeting by electronic means. The members may cast their votes using an electronic voting system. (**'remote e-voting'**).
 - The Company has engaged the services of Central Depository Services Limited ("CDSL") as the Agency to provide e-voting facility.
 - The Board of Directors of the Company has appointed Mr. K.C. Nevatia Proprietor of M/s. K. C. Nevatia & Associates, Company Secretaries, (FCS: 3963, CP No.2348) as the Scrutinizer, to scrutinize the e-voting during the AGM and remote e-voting process prior to AGM in a fair and transparent manner and he has communicated his willingness to be appointed and will be available for same purpose.
 - Voting rights shall be reckoned on the paid-up value of shares registered in the name of the member/beneficial owner (in case of electronic shareholding) as on the cut-off date i.e. **19th July, 2024**.
 - A person, whose name is recorded in the register of members or in the register of beneficial owners maintained by the depositories as on the cut-off date, i.e., **19th July, 2024** only shall be entitled to avail the facility of remote e-voting OR e-voting at the AGM.

- (1) The voting period begins on **22nd July, 2024 at 9.00 a.m. and ends on 25th July, 2024 at 5.00 p.m.** During this period, Shareholders of the Company, holding shares either in physical form or in dematerialized form, as on the cut-off date of 19th July, 2024 may cast their vote electronically. The e-voting module shall be disabled by CDSL for voting thereafter.
- (2) Shareholders who have already voted prior to the meeting date would not be entitled to vote at the meeting.
- (3) Pursuant to SEBI Circular No. SEBI/HO/CFD/CMD/ CIR/P/2020/242 dated 09.12.2020, under Regulation 44 of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, listed entities are required to provide remote e-voting facility to its shareholders, in respect of all shareholders' resolutions.

However, it has been observed that the participation by the public non-institutional shareholders/retail shareholders is at a negligible level. In order to increase the efficiency of the voting process, pursuant to a public consultation, it has been decided to enable e-voting to all the demat account holders, by way of a single login credential, through their demat accounts/ websites of Depositories/ Depository Participants. Demat account holders would be able to cast their vote without having to register again with the ESPs, thereby, not only facilitating seamless authentication but also enhancing ease and convenience of participating in e-voting process.

- (4) In terms of SEBI circular no. SEBI/HO/CFD/CMD/ CIR/P/2020/242 dated 9th December, 2020 on e-Voting facility provided by Listed Companies, Individual shareholders holding securities in demat mode are allowed to vote through their demat account maintained with Depositories and Depository Participants. Statement Pursuant to Section 102 (1) of the Companies Act, 2013 (“The Act”)

Annexed to the Notice convening the Thirtieth (30th) Annual General Meeting Scheduled to be held on Friday, 26th July, 2024.

Item No. 4:

The Board of Directors, at its Meeting held on 2nd May, 2024 upon the recommendation of the Audit Committee, approved the re-appointment of M/s. Manisha & Associates, Cost Accountants as Cost Auditors of the Company for the Financial Year ending on 31st March, 2025, to conduct audit of cost accounting records of the Company as may be required for cost audit under the Companies Act, 2013, and Rules made thereunder, at a remuneration of Rs. 45,000 (Rupees Forty-Five Thousand only) (plus Goods and Services Tax and reimbursement of out-of-pocket expenses, if any).

In accordance with the provisions of Section 148 of the Act read with the Companies (Audit and Auditors) Rules, 2014, the remuneration proposed to be paid to the Cost Auditor, is required to be ratified by the shareholders of the Company.

Accordingly, consent of the Members is sought for passing an **Ordinary Resolution** as set out at Item No. 4 of the Notice for ratification of the remuneration payable to the Cost Auditors for conducting the audit of the cost records of the Company for the Financial Year ending 31st March, 2025.

M/s. Manisha & Associates have furnished a certificate dated 26th April, 2024 regarding their eligibility for reappointment as Cost Auditors of the Company.

None of the Directors, Key Managerial Personnel of the Company and their relatives are, in any way, concerned or interested, financially or otherwise, in the Resolution set out at Item No. 4 of the Notice.

The Board recommends the **Ordinary Resolution** set out at Item No. 4 of the Notice for approval of the Members.

Item 5:

As per Regulation 17(1A) of SEBI (LODR) Regulations, 2015, No listed entity shall appoint a person or continue the directorship of any person as a non-executive director who has attained the age of seventy-five years unless a special resolution is passed to that effect.

Mr. Rajashekhar Mallikarjun Alegavi (DIN: 03584302) Non-Executive Director of the Company sought for continuation of his appointment who shall be attaining the age of seventy-five (75) years i.e., from 24th April, 2025.

Mr. Rajashekhar Mallikarjun Alegavi (DIN: 03584302) is B.E. Chemical Engineering, 1st Class from Mysore University, having 47 years rich experience in Design, Manufacturing, Erection and Commissioning of Chemical Equipment both in Hydro Carbon and Non-Hydro Carbon Industries and clean environment like Air/

Gas/Liquid Dryers, Heat Exchangers, Boilers, Power Plant and LPG Loading Stations.

He has also served in various Engineering Industries for 18 years and thereafter headed a Process Equipment Engineering Company for over 18 years and held Consultancy cum-Advisory Position in Lloyds Group for over a decade.

His technical expertise is in design and process equipments which have been recognized by reputed consultancy organizations such as Engineers India Limited amongst others.

He being a Non-Executive Director of the Company since 2019 i.e. for more than five years and carries a rich experience of 65 years in other fields which includes Design and Engineering which will be beneficial for the Company. He is a Professional and Technical Expert in designing and engineering of various equipment's and renders professional, technical, and technological advice to the company from time to time on need-based requirements.

Mr. Rajashekhar Mallikarjun Alegavi (DIN: 03584302) being an experienced professional has been valuable to our Company's Board and has advised positively only for the betterment of the Company. Hence, Board of Directors at its meeting held on 2nd May, 2024 has approved continuation of appointment of Mr. Rajashekhar Mallikarjun Alegavi (DIN: 03584302) as a Non-Executive Director of the Company after attaining the age of seventy-five years from 24th April, 2025 based on the recommendations of nomination & remuneration committee and members approval has been sought for the same as Regulation 17 (1A) of SEBI (LODR) Regulations, 2015, mandates the Company to take Members Approval by Special resolution for all the Non-Executive Directors of the Company who has attained the age of seventy five years.

Except Mr. Rajashekhar Mallikarjun Alegavi, being an appointee, none of the other Directors, Key Managerial Personnel of the Company and their relatives are, in any way concerned or interested in resolution set out at Item no. 5 of the Notice.

The Board recommends the **Special Resolution** set forth in Item No. 5 of the Notice for approval of the Members.

Item no. 6:

As per Regulation 17(6)(a) of SEBI (LODR) Regulations, 2015, all fees or compensation (except sitting fees), if any, paid to non-executive directors, including independent directors and shall require approval of shareholders in general meeting.

Mr. Rajashekhar Mallikarjun Alegavi (DIN: 03584302) is a Non-Executive Director of the Company and rendering Technical Consultancy services to the Company based on his rich and core experience in the field of Company's engineering business. Mr. Rajashekhar Mallikarjun Alegavi is a Professional and Technical Expert in designing and engineering of various equipment's and renders professional, technical, and technological advice to the company from time to time on need-based requirements.

Accordingly, Consent of the Members is required to approve Technical Consultancy charges/ fees towards the Technical Consultancy services rendered by Mr. Rajashekhar Mallikarjun Alegavi, Non- Executive Directors of the Company in a year aggregate to Rs. 1 Crore. The Company has taken appropriate approvals of Audit Committee and Board of Directors pursuant to the section 188 of the Companies Act, 2013 as this transaction is at arm length price and ordinary course of business.

However, Regulation 17 of SEBI (LODR) Regulations, 2015 mandates shareholders' approval in case of all fees or compensation, if any, paid to non-executive directors. This has necessitated seeking approval of the Members by way of a special resolution for payment of Technical Consultancy charges/ fees to Mr. Rajashekhar Mallikarjun Alegavi, non- executive Director of the Company as per terms and conditions of the respective service agreement as may be executed of aforesaid, in order to comply with the above-mentioned Regulation 17(6)(a) of SEBI (LODR) Regulations, 2015.

The Board of Directors therefore recommends the resolution as set out in Item No. 6 of the Notice for approval of members of the Company by way of a **Special Resolution**.

None of the Director apart from above and any of the Key Managerial Personnel of the Company and their relatives are concerned or interested, financially or otherwise, in the said resolution.

Item No. 7:

As per Regulation 17(1A) of SEBI (LODR) Regulations, 2015, No listed entity shall appoint a person or continue the directorship of any person as a non-executive director who has attained the age of seventy-five years unless a special resolution is passed to that effect.

Mr. Devidas Kashinath Kambale was appointed as Independent Director via postal ballot on 28th May, 2024 for a first term commencing from 6th March, 2023 to 30th September, 2028 and members approval sought for continuation of Mr. Devidas Kashinath Kambale, Non-Executive Independent Director who shall be attaining the age of seventy-five (75) i.e., from 1st June, 2026.

Mr. Devidas Kashinath Kambale who holds a Professional Degree of Masters in Financial Management from J. Bajaj Institute of Management is also a certified banker in the course of Chartered Associate of India Institute of Bankers (CAIIB) Exam which is conducted by the IIBF (Indian Institute of Banking and Finance). He also holds a Degree in Master of Commerce.

He is having more than 30 years' experience in banking sector and also worked with IDBI at senior levels.

During his long period of service, he worked in all the Operational Departments like Project Appraisal, Corporate Finance Departments and Rehabilitation Department and also headed Corporate Debt Restructuring Cell (CDR).

He has a rich exposure in the areas like Project Monitoring & follow up, Recovery, CDR, Priority Sector Dept, and he also represented as a nominee of IDBI on the Board of the various companies like companies like Balrampur Chini, S. Kumars Nationwide, SJK Steel

Co. Ltd (now taken over by Kalyani Group), Kumar Metallurgical, Sanghi Industries Ltd, Ashok Papers, Gayatri Sugars.

He was involved in appraisal of various Green Projects including projects like Binani Cement Limited and Neelachal Ispat Nigam Limited.

As CAIIB provides an advanced knowledge necessary for better decision-making covering Treasury Management, Risk Management, Balance Sheet Management, Credit Management, International Banking, Economic Analysis etc, Mr. Devidas Kambale being an experienced professional shall be valuable to our Company's Board and for the betterment of the Company.

Hence, the Board at its meeting held on 2nd May, 2024 has approved continuation of term of Mr. Devidas Kashinath Kambale after attaining the age of seventy-five years from 1st June, 2026 till 30th September, 2028, on the recommendation nomination & remuneration committee and members approval has been sought for the same.

Except Mr. Devidas Kashinath Kambale, none of the Directors, Key Managerial Person(s) of the Company including their relatives other than mentioned above are, in any way, concerned or deemed to be interested in the proposed resolution.

The Board recommends the **Special Resolution** set forth in Item No. 7 of the Notice for approval of the Members.

Item No.8:

In terms of Section 149 and other applicable provisions of the Companies Act, 2013 ("Act") and rules made thereunder, Mr. Lakshman Ananthsubramanian (DIN: 08648489) aged 75 years, who had been appointed as a Non-Executive Independent Director of the Company for a period of five years from 24th January, 2020 to 23rd January, 2025, by the shareholders at the 26th Annual General Meeting ('AGM') held on 8th September, 2020.

Accordingly, he is due for his retirement from the first term as a Non-Executive Independent Director on 23rd January, 2025. Section 149(10) of the Act, provides that an Independent Director shall hold office for a term up to five consecutive years on the Board of a Company but shall be eligible for re-appointment, for another term of upto five years, on passing of a Special resolution by the Member/ Shareholders. In terms of Section 149 read with Section 152 and Schedule IV of the Act, Mr. Lakshman Ananthsubramanian (DIN: 08648489) is entitled for second term as an Independent Director of the Company. The performance evaluation of Mr. Lakshman Ananthsubramanian, for the financial year ended 31st March, 2024, was carried out by other Independent Directors.

Mr. Lakshman Ananthsubramanian was rated highly as an Independent Director of the Company on the various evaluation parameters. The evaluation outcome was placed before the Nomination and Remuneration Committee (NRC) and the Board, the Board has discussed the same and expressed satisfaction over the evaluation outcome. Consequently, the Board based on the outcome of his performance evaluation and recommendation of the NRC, is of the opinion that Mr. Lakshman Ananthsubramanian fulfils the conditions for his re-appointment as an Independent Director as specified in the Act and the SEBI (Listing Obligations

and Disclosure Requirements) Regulations, 2015 ('SEBI Listing Regulations') and is independent of the management.

The NRC and the Board are of the view that the continued association of Mr. Lakshman Ananthsubramanian and his rich experience and vast knowledge that he brings with him would be in the interest of the Company.

The Board also believes that he possesses appropriate skills, expertise and competencies in the context of the Company's businesses. Considering the above, it is recommended to re-appoint Mr. Lakshman Ananthsubramanian (DIN: 08648489) aged 75 years as a Non-Executive Independent Director for the second term of five (5) consecutive years with effect from 24th January, 2025 till 23rd January, 2030, not liable to retire by rotation, by passing the special resolution as set out in the Notice of the 30th AGM.

The Company has received, inter alia, (i) declaration in form DIR-8 pursuant to Rule 14 of the Companies (Appointment and Qualification of Directors) Rules, 2014, from Mr. Lakshman Ananthsubramanian to the effect that he is not disqualified under Section 164 of the Act; (ii) declaration that he meets the criteria of independence as provided in the Act and the SEBI Listing Regulations; (iii) declaration that he is not debarred or restrained from acting as a Director by any SEBI order or by any other such authority; and (iv) a notice in writing from a member under Section 160 of the Act proposing the candidature of Mr. Lakshman Ananthsubramanian as an Independent Director of the Company. Other details of Mr. Lakshman Ananthsubramanian pursuant to Regulation 36(3) of the SEBI Listing Regulations and Secretarial Standard - 2 are given in Annexure-A, annexed herewith.

Profile of Mr. Lakshman Ananthsubramanian.

Mr. Lakshman Ananthsubramanian, Bachelor of Science (Science) Graduate, aged 75 years is an experienced Banking Professional, who had joined the Reserve Bank of India in 1970 and after serving 8 years at Reserve Bank of India (RBI), was deputed to Industrial Development Bank of India (IDBI) which was a subsidiary of the Reserve Bank of India.

Mr. Lakshman Ananthsubramanian during his 29 years meritorious service with RBI/IDBI has appraised more-than 100 medium sized and large projects in Steel, Cement, Textiles and Infrastructure and handled Merchant Banking Division as well as Investor Relations during his tenure at IDBI.

Mr. Lakshman Ananthsubramanian, after voluntary retirement from IDBI in 2007 as General Manager, worked in UK as Consultant for 3 years.

Mr. Lakshman Ananthsubramanian being an experienced professional has been valuable to our Company's Board and has advised positively for the betterment of the Company.

The Board at its meeting held on 2nd May, 2024, has approved the re-appointment of term of Mr. Lakshman Ananthsubramanian for second term of five consecutive years with effect from 24th January, 2025 till 23rd January, 2030 who has attained the age of 75 years on 19th June, 2024, based on the recommendations received by Nomination & Remuneration Committee, members approval has been sought for the same.

Except Mr. Lakshman Ananthsubramanian and his relatives, none of the other Directors or Key Managerial Personnel of the Company and their relatives are concerned or interested, financially or otherwise, in the resolution set out in Item No. 8 of the Notice of the 30th AGM.

The Board, recommends the **Special Resolution** set forth in item no. 8 of the Notice for approval of the members.

Item No. 9:

As per the requirements of Regulation 23(4) of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ('SEBI Listing Regulations'), all material related party transactions shall require the approval of Members through a Resolution. Further, the explanation to Regulation 23(1) of the SEBI Listing Regulations states that a transaction with a related party shall be considered material if the transaction(s) to be entered into individually or taken together with previous transactions during the financial year, exceeds 10% of the annual consolidated turnover of the Company as per the last audited financial statements of the Company.

M/s. Lloyds Metals and Energy Limited falls under the definition of "Related Party" within the meaning of Section 2(76) of the Act and Regulation 2(1) (zb) of the Listing Regulations. The Company has entered into transaction related to sale, purchase, supply and service Contract (s)/Arrangement(s)/Transaction(s) with M/s Lloyds Metals and Energy Limited, accordingly shareholder's approval was accorded in the 29th Annual General Meeting held on 24th July, 2024 for the maximum aggregate limit of Rs. 1000 Crore. However, Company intends to place new sale, purchase, supply and service Contract (s)/Arrangement(s)/Transaction(s) with M/s Lloyds Metals and Energy Limited and sought members approval for a limit of 2000 (Two Thousand) Crore at any given financial year.

Accordingly, the Board of Directors of the Company, based on the approval of Audit Committee at their meeting held on 2nd May, 2024 have approved the aggregate limit of Rs. 2000 (Two Thousand) Crore during the financial year 2024-25 and now seek approval of the shareholders by way of Ordinary Resolution to enable the Company to continue and/or enter the following Related Party Transaction in one or more tranches. The Contract(s)/ arrangement(s)/ transaction(s) under consideration, is to be entered into by the Company with M/s. Lloyds Metals and Energy Limited at arm's length basis.

Details of the proposed RPTs between the Company and LMEL, including the information required to be disclosed in the Explanatory Statement pursuant to the SEBI Circular No. SEBI/HO/CFD/CMD1/CIR/P/2021/662 dated 22nd November, 2021, are as follows:

Management Discussion and Analysis

Global economic review

Overview: The global economy registered a decline in growth from 3.5% in 2022 to an estimated 3.1% in 2023. Asia is expected to contribute significantly to global growth in 2023-24, despite the weaker-than-expected recovery in China, sustained weakness in USA, rising energy costs in Europe, weak global consumer sentiment due to the Ukraine-Russia war, and the Red Sea crisis resulting in increased logistics costs. A tightening monetary policy translated into increased policy rates and interest rates for new loans.

Growth in advanced economies is estimated to decline from 2.6 percent in 2022 to 1.5 percent in 2023 and further, 1.4 percent in 2024 as policy tightening takes effect. Emerging market and developing countries are projected to report a modest decline in economic growth from 4.1 percent in 2022 to 4.0 percent in 2023 and 2024. Global inflation is projected to decline steadily from 8.7 percent in 2022 to 6.9 percent in 2023 and 5.8 percent in 2024 on account of a tighter monetary policy coupled with relatively lower international commodity prices. Core inflation is expected to decrease gradually, as inflation is not expected to return to its target until 2025 in most cases. The US Federal Reserve approved a much-anticipated interest rate hike that raising the benchmark borrowing costs to their highest in over 22 years.

Global trade in goods was expected to have decreased by an approximate US\$2 trillion in 2023; trade in services increased by an estimated US\$500 billion. The average cost of Brent crude oil in 2023 stood at \$83 per barrel, a downturn as compared to \$101 per barrel in 2022. This decrease comes on account of from Russia finding crude oil destinations outside the European Union and global crude oil demand falling short of expectations.

Global equity markets ended 2023 on a strong note, with major global equity benchmarks achieving double-digit returns. This outperformance was driven by a downturn in global inflation, slide in the dollar index, declining crude prices and higher expectations of rate cuts by the US Fed and other Central banks.

Regional growth (%)	2023	2022
World output	3.1	3.5
Advanced economies	1.69	2.5
Emerging and developing economies	4.1	3.8

(Source: UNCTAD, IMF)

Performance of major economies, 2023

United States: Reported GDP growth of 2.5% in 2023 compared to 1.9% in 2022

China: GDP growth was 5.2% in 2023 compared to 3% in 2022

United Kingdom: GDP grew by 0.4% in 2023 compared to 4.3% in 2022

Japan: GDP grew 1.9% in 2023 unchanged from a preliminary 1.9% in 2022

Germany: GDP contracted by 0.3% in 2023 compared to 1.8% in 2022

(Source: PWC report, EY report, IMF data, OECD data, Livemint)

Outlook: Asia is poised to continue leading global growth in 2024-25. Inflation is expected to ease gradually as cost pressures decreases; headline inflation in G20 countries is projected to decline. Amid high inflation and monetary tightening, the global economy has shown resilience as the growth is expected to be stabilized at previous levels over next two years (Source: World Bank).

Indian economic review

Overview: The Indian economy was estimated to grow 7.8 per cent in FY 2023-24 as against 7.2 per cent in FY 2022-23 primarily driven by improved performance in the mining and quarrying, manufacturing and certain segments of the services sector. India has maintained its position as the fifth largest economy in the world. The Indian rupee displayed relative resilience compared to the previous year as the rupee depreciated 0.8% from Rs 82.66 against the US dollar on the first trading day of 2023 to Rs 83.35 on 27th December versus the greenback.

In the 11 months of FY 2023-24, the CPI inflation experienced an average of 5.4 percent with rural inflation exceeding urban inflation. Food inflation experienced a spike on account of lower production and erratic weather. Core inflation, on the other hand, averaged at 4.5 percent, down from 6.2 percent in FY 23, moderated by softening global commodity prices.

India's foreign exchange reserves reached a historic peak of \$645.6 billion. The credit quality of Indian companies remained robust from October 2023 to March 2024 on account of deleveraged Balance Sheets, sustained domestic demand and government-led capital expenditure. Rating upgrades continued to surpass rating downgrades in the second half of FY24. UPI transactions in India witnessed a record 56 per cent growth in volume and 43 per cent growth in value in FY24.

India's monsoon in 2023 hit a five-year low, with August marking the driest month in a century. Despite receiving only 94 per cent of its long-term average rainfall from June to September, wheat production estimatedly recorded 114 million tonnes in the 2023-24 crop year due to higher coverage. Rice production was anticipated to decrease to reach 106 million metric tons (MMT) in comparison to 132 million metric tonnes in the previous year. Total kharif pulses produced in 2023-24 stood at an estimated 71.18 Lakh metric tonnes, which is lower than FY 2022-23 due to climatic conditions. As per the first advance estimates of national income released by the National Statistical Office (NSO), the manufacturing sector output is projected to have grown 6.5 per cent in 2023-24 compared to 1.3 per cent in 2022-23. The Indian mining sector experienced an estimated growth of 8.1 per cent in 2023-24 compared to 4.1 per cent in 2022-23. Financial services, real estate and professional services grew a projected 8.9 per cent in 2023-24 compared to 7.1 per cent in FY 2022-23.

Real GDP or GDP at constant prices increased from to Rs 160.71 Lakh Crore in 2022-23 (provisional GDP estimate released on 31st May, 2023) to an estimated Rs. 173.82 Lakh Crore in 2023-24. Growth in real GDP during 2023-24 stood at 8.2 per cent compared to 7.2 per cent in 2022-23. Nominal GDP or GDP at current prices was estimated at Rs 295.36 Lakh Crore in 2023-24 as compared to the provisional 2022-23 GDP estimate of Rs 269.50 Lakh Crore. The gross non-performing asset ratio for scheduled commercial banks improved from 4.1 per cent as of March 2023 to 2.8 per cent as of March 2024.

India's exports of goods and services were expected to reach \$900 billion in 2023-24 compared to \$770 billion in the previous year despite global headwinds. Merchandise exports were expected to expand between \$495 billion and \$500 billion, while services exports were expected to touch \$400 billion during the year. India's net direct tax collection increased 17.7 per cent to Rs. 19.58 Lakh Crore in FY24. Gross GST collection amounted to Rs 20.2 Lakh Crore, marking an 11.7% increase, with an average monthly collection of Rs 1,68,000 Crore, surpassing the previous year's average of Rs 1,50,000 Crore.

The agriculture sector was grew an estimated 1.8 per cent in 2023-24, lower than the 4 per cent expansion in 2022-23. Trade, hotel, transport, communication and services related to broadcasting segment are estimated to grow at 6.3 per cent in 2023-24, a contraction from 14 per cent in 2022-23. The Indian automobile segment was expected to close FY 2023-24 with a growth of 6-9 per cent, despite global supply chain disruptions and rising ownership costs. The construction sector was expected to grow 10.7 per cent year-on-year from 10 per cent in 2023-23. Public administration, defence and other services were projected to grow by 7.7 per cent in 2023-24 as against 7.2 per cent in FY2022-23. The growth in gross value added (GVA) at basic prices was pegged at 6.9 per cent, down from 7 per cent in 2022-23.

India entered a pivotal phase in its S-curve, marked by rapid urbanisation, industrialisation, increase in household incomes and rising energy consumption. The country emerged as the fifth largest economy with a GDP of US\$3.6 trillion and nominal per capita income of Rs. 123,945 in 2023-24.

In FY2023-24, India's Nifty 50 index experienced a 30% growth, propelling India's stock market to become the fourth largest globally with a market capitalisation of US\$4 trillion. Foreign investment in Indian government bonds saw a significant increase in the final quarter of 2023. India ranked 63rd out of 190 economies in the ease of doing business, according to the latest World Bank annual ratings. Moreover, India's unemployment rate decreased to 3.2% in 2023, down from 6.1% in 2018.

Outlook: India successfully tackled its global economic challenges in 2023 and is poised to continue as the world's fastest-growing major economy backed by a growing demand, moderate inflation, stable interest rates and robust foreign exchange reserves. The Indian economy is anticipated to surpass USD 4.34 trillion in 2025.

Union Budget FY 2024-25: The Interim Union Budget 2024-25 continued to prioritise capital expenditure spending, comprising investments in infrastructure, solar energy, tourism, medical ecosystem and technology. In 2024-25, the top 13 ministries in terms of allocations accounted for 54% of the estimated total expenditure. Of these, the Ministry of Defence received the highest allocation at Rs 6,21,541 Crore, constituting 13% of the total budgeted expenditure of the central government. Other ministries with high allocation included Road transport and highways (5.8%), Railways (5.4%) and Consumer Affairs, food and public distribution (4.5%).

Global engineering market overview

The engineering services market has grown steadily in recent years and expected to grow from \$1147 billion in 2023 to \$1188.41 billion in 2024. The engineering services market size is expected to see steady growth in the next few years, likely to grow to \$1366.8 billion in 2028 at a compound annual growth rate (CAGR) of 3.6%.

Steady economic growth in developed and developing countries is expected to be a favorable factor for the engineering services sector. The International Monetary Fund (IMF) projects a global real GDP growth of 3.6% from 2021 to 2023, with a focus on Asia and Africa driving this trend. The report highlights that Asia is anticipated to constitute 66% of the global middle-class population by 2030. Consequently, the sustained economic growth in developed and developing nations is contributing to the growth of the engineering services market.

Global nuclear reactor construction is driving this market; during the 28th conference of the parties to the United Nations Framework Convention on Climate Change (UNFCCC) in December 2023 in Dubai, 25 countries (including France, the United Kingdom, and the United States and non-nuclear countries like Albania, Ghana, and Moldavia) pledged to triple the global installed nuclear capacity by 2050.

With an average annual urbanization of 3%, East Asia and Pacific urbanizing the fastest, likely to fuel engineering services growth in the region. The construction management segment accounts for a share of 23% of the global engineering service market and the industrial sector projected for a leading share of 21%. The EU is

urbanised, with nearly 75% of its citizens living in cities and towns and 80% expected to do so by 2050. The US, China, Germany, the UK, and Japan are the largest country markets for Engineering Services. North America tops the global market with 38% market share.

Indian engineering market overview

India's engineering services market was valued at USD 65.3 billion in 2023 and expected to reach USD 88.77 billion by 2028, growing at a CAGR of 6.35% during the forecast period. Engineering is the largest industrial sector in India, accounting for 27% of the total factories in the industrial sector and representing 63% of foreign collaborations. The demand for engineering sector services is being driven by capacity expansions in industries like infrastructure, electricity, mining, oil and gas, refinery, steel, automobiles, and consumer durables.

FDI inflow for miscellaneous mechanical and engineering industries stood at US\$ 4.42 billion between April 2000 and September 2023. Engineering accounted for about 25% of India's total global exports in the goods sector and was one of the largest foreign exchange earners.

India's engineering goods are exported to key markets such as the US, Europe, and China. Engineering exports in FY24 rose to \$109.31 billion from \$107.04 billion in the previous financial year, thus registering a growth of 2.13 per cent, engineering goods exporters expects the value of shipments from the sector to rise to \$300 billion by 2030. North America and the European Union (EU) remained India's top destinations for engineering exports with a share of 20% and 19%. (Sources: Mordorintelligence, IBEF, Businessstandard)

Steel: India is the world's second-largest producer of crude steel, with an output of 125.32 MT of crude steel and finished steel production of 121.29 MT in FY23. The annual production of steel is anticipated to exceed 300 million tonnes by 2030-31. By 2030-31, crude steel production is projected to reach 255 million tonnes. Under the Union Budget 2023-24, the government allocated Rs. 70.15 Crore (US\$ 8.6 million) to the Ministry of Steel.

The steel sector's capital expenditure target for FY 2023-24 was Rs. 10,300.85 Crore. Against this target, steel central public sector enterprises achieved a capex of Rs. 5414.51 Crore till November, 2023 (52.6%). In FY2024-25, India plans to increase infrastructure capital expenditure 11.1% year-on-year – to Rs. 11 trillion (\$134 billion) – that could increase domestic demand for steel. (Sources: IBEF, Pib.gov.in, GMKcenter)

Nuclear power: Some 23 nuclear power reactors are installed in India. The Government initiated steps to increase nuclear power capacity from 7480 MW to 22480 MW by 2031-32. The construction and commission of ten reactors (8000 MW) is underway in Gujarat, Rajasthan, Tamil Nadu, Haryana, Karnataka and Madhya Pradesh.

In addition, the government accorded in principle approval to set up a nuclear power plant in cooperation with the USA at Kovvada

in Srikakulam district in Andhra Pradesh. The government aims to build 11,000 MW of new nuclear power generation capacity by 2040, (Sources: Pib.gov.in, Theeconomicstimes)

Marine: As per report 2023, in the ship-building sector, the investment multiplier is around 1.82, which means that an infusion of approx. Rs 1.5 Lakh Crore in naval ship-building projects would accrue a circulation of Rs 2.73 Lakh Crore in the ship building sector due to the multiplier effect.

In a major move towards achieving India's goal of becoming the 'Global Hub for Green Shipbuilding' by 2030, GRSE signed a MoU in November 2023 with Shift Clean Energy (Shift), Seatech Solutions International (Seatech) and the American Bureau of Shipping (ABS), to develop electric tugs E-VOLT 50. The E-VOLT 50 aims to reduce carbon emissions.

A plethora of initiatives are being undertaken by the government to boost the shipping industry. The Ministry of Ports, Shipping and Waterways (MoPSW), under the Amrit Kaal vision, has identified a total potential of 1,300 million tonnes per annum (mtpa) of cargo movement through coastal shipping by 2047. Shipbuilding is one of the top priority areas for the MoPSW. In a notable development, three major infrastructure projects worth more than Rs 40 billion were inaugurated in Kochi, Kerala on January 2024.

The Global Maritime India Summit, 2023, one of the largest maritime summits in the world, anchored Rs. 10 Lakh Crore of investment making a significant stride towards achievement of 'Amrit Kaal Vision 2047' of Rs. 80 Tn investment. India plans to invest US\$ 82 billion in port projects by 2035. FDI equity inflow in the Port industry is US\$ 1.63 billion during the period April 2000 to September 2023. Jawaharlal Nehru Port Trust (JNPT) Special Economic Zone (SEZ) became the first of its kind operational port-based multi-product SEZ in India. (Sources: Pib.gov.in, IndiaInfrastructure, Theeconomicstimes, IBEF)

Oil and gas: India's economic growth is related to energy demand. In view of this, the need for oil and gas is projected to increase, making the sector conducive for investment. India retained its spot as the third-largest consumer of oil in the world in 2023.

Oil demand in India is projected to register 2x growth to 11 million barrels per day by 2045. Diesel demand in India is expected to double to 163 MT by 2029-30, with diesel and gasoline covering 58% of India's oil demand by 2045. Consumption of natural gas in India is expected to grow by 25 billion cubic metres (BCM), registering an average annual growth of 9% until 2024. Crude oil imports increased by 5.7% and 0.9% during January 2024 and April-January 2023-24 respectively as compared to the corresponding period of the previous year.

The industry is expected to attract US\$ 25 billion investment in exploration and production. India is already a refining hub with 23 refineries, and expansion is planned for tapping foreign investment in export-oriented infrastructure, including product pipelines and export terminals. State-run oil companies made a combined capital spending of Rs. 1,28,000 Crore in 2023-24, a fifth more than the capex target they had set at the beginning of the year and 12% more than the amount they spent the previous year. (Sources: IBEF, Theeconomicstimes)

Manufacturing: The Indian manufacturing sector is experiencing a surge in investments, marking a significant milestone in the nation's economic landscape. This has poised India's manufacturing market to reach \$1 trillion by 2025-26. India has potential to become a global manufacturing hub and by 2030, it can add more than US\$ 500 billion annually to the global economy. According to the Department for Promotion of Industry and Internal Trade (DPIIT), India received a total foreign direct investment (FDI) inflow of US\$ 48.03 billion in FY23. One of the initiatives by the Government of India's Ministry for Heavy Industries & Public Enterprises is SAMARTH Udyog Bharat 4.0, or SAMARTH advanced manufacturing and rapid transformation hubs. This is expected to increase competitiveness of the manufacturing sector in the capital goods market. (Sources: IBEF, Businessstandard)

Growth drivers

Urbanization: With urbanization, there is an increasing demand for sustainable and modern infrastructure in cities. This includes the development of smart cities, urban transport networks like metro rail services, and green infrastructure. The estimated urban population could be 590 million people by 2030, the number is rising 2.3 per cent each year.

Connectivity projects: Major projects like Bharatmala, Sagarmala, and the dedicated freight corridors aim to upgrade transportation. These initiatives are providing business opportunities in the area of project development, operations, and logistics. Bharatmala Pariyojana is the largest highway infrastructure programme in India, which aims at the development of 34,800 kilometres of national highway corridors at an investment of Rs 5.35 trillion approved in 2017. Some 15,549 km construction have been completed.

Government support: In the Union Budget 2023-24, the government committed an outlay of Rs. 10 Lakh Crore (US\$ 120 billion) during 2023-24 towards infrastructure capital expenditure compared to Rs. 7.5 Lakh Crore (US\$ 90 billion) of budgetary estimate during 2022-23.

Investment in R&D sector: Investment in engineering R&D sector is expected to reach USD 6.3 billion by 2025. India's engineering R&D landscape comprises Global Capability Centres (GCCs), Engineering Service Providers (ESPs), start-ups, and India-based manufacturing companies.

Rapid adoption of advance technologies: Modern construction, design and engineering projects have become extremely complex and requires engineers for essential inputs from vivid background along with advance technologies like artificial intelligence, internet of things and IT solutions such as engineering analytics. Indian Government initiatives

- Capital investment outlay for infrastructure is being increased 33% to Rs. 10 Lakh Crore (USD 122 billion) in 2023-2024, which could be 3.3 per cent of GDP and almost three times the outlay in 2019-20.

- In recent years, there has been an increase in national highway construction pace - from an average of 12 kilometres per day in 2014-15 to around 34 kilometres per day in 2023-24.
- The government launched the National Infrastructure Pipeline (NIP) with a forward-looking approach and with a projected infrastructure investment of around Rs. 111 Lakh Crore (US\$ 1.3 trillion), during FY20-25 to provide quality infrastructure. The NIP has 8,964 projects with a total investment of more than Rs. 108 Lakh Crore (US\$ 1.3 trillion) under different stages of implementation. Increased construction of National Highways (NHs)/roads over time, with 10,993 km of roads constructed in FY23 as compared to 6,061 km in FY16.
- Total budgetary support for investment in the sector has been increasing rapidly in the last four years and stood at around Rs. 1.4 Lakh Crore (US\$ 16.8 billion) during FY23
- Under the Union Budget 2023-24, the government allocated Rs. 70.15 Crore (US\$ 8.6 million) to the Ministry of Steel.
- India is currently on the second stage of its ambitious nuclear program. The country is planning to construct 12 new nuclear power reactors by 2024.
- The government allotted the Department of Atomic Energy an increased budget by 10,000 Crore (US\$ 1.31 billion) per year for the next 10 years.
- In FY 2023-24, major ports saw substantial investment exceeding Rs. 12,500 Crore through capital infusion, sanctioning and award of public private partnerships.
- AICTE is implementing the Pradhan Mantri Kaushal Vikas Yojna (PMKVY) for technical institutes scheme through AICTE-approved technical institutions. Under this Scheme in the next three years, 10.5 Lakh youth are to be provided engineering Skills. (Sources: IBEF, Aicte-indi)

Company overview

Lloyds Engineering Works Ltd is a customised engineering product and solutions providing company in India. It provides a complete package of engineering solutions by carrying out designing, engineering, manufacturing, fabrication and installation. Its products cover a whole array of categories in heavy equipment, machinery and systems for hydrocarbon sector, oil & gas, steel plant equipments, power plants, nuclear plant and boilers etc. Its facilities have been approved by various authorities like industrial Boiler Regulatory Authority, SGS UK, Petroleum and Explosives Safety Organisation etc. The Company has state-of-the-art manufacturing facilities in Murbad, Thane; the company is headquartered in Mumbai (235 employees as on 31st March, 2024).

The Company caters to the following industries:

Hydrocarbon: Manufacturing and supplying process equipment such as pressure vessels, columns, reactors, heat exchangers, air/ gas /liquid dryer packages.

Steel: Fabrication of equipment for steel melting shop, manufacturing equipment in the hot rolling mill and cold rolling ,

ball mills, rotary dryer, WHR Boiler, DRI Plant and other equipment required for iron and steel making.

Nuclear: Lloyds Engineering is registered with BARC (Bhabha Atomic Research Centre) and NPCIL (Nuclear Power Corporation of India) for the supply of equipment based on basic design engineering provided by NPCIL and further design engineering, to be done by company for equipment.

Marine/Defence: The company is engaged in manufacturing and supplying products like a fin stabiliser required to be setup in navy warships and the electro-hydraulic steering gear for marine ships etc.

Ports, jetties and refineries: The company is engaged in the design, engineering and supply of critical components like swivel joints, seals, coupler hydraulic valve etc. It is a leading manufacturer of truck and wagon loading arms for handling different products.

Power: The company is engaged in the design, and manufacture of thermal power plants and equipment in boilers, condensers, heaters etc.

Risk & concerns

The Banks are cautious in their lending to the Corporate Sector perhaps on account of large Non-Performing Assets (NPA). This has impacted the investment by Public and Private Corporate Sectors in their expansion plans. Margins in the Engineering Industry continue to be under pressure. We are continuously up-grading our skills, modernization, and cost saving. Risk and concerns are being addressed on a continuous basis. The business has weathered the challenges posed by the COVID-19 pandemic by adopting safe working practices, encouraging work from home whenever needed, increasing the virtual meetings, virtual audits and inspections, online approvals amongst other measures. The Company's strong financial statements & negligible financial leverage is advantageous to get benefit of the Risk faced by most of the industries.

Internal control system and audit

The Company believes in systematic working and placing appropriate internal control systems and checks. Proper checks and systems are in place and regular reviews are held by the Head of Department and Senior Management to check that the systems and controls are adhered. The reviews also prescribe changes wherever required. The efficiency of Internal Control Systems is ensured as a combined result of the following activities:

- Operational performance is reviewed in the Works as well as in the Corporate Office by the Senior Management through daily follow-up/weekly meetings.
- Performance of each function is closely monitored by the Head of Department and Senior Management through daily/weekly/monthly review meetings. Reviews of all independent functions are regularly undertaken. Cross functional activities are periodically reviewed.
- Various policies are introduced from time to time to ensure effective functioning of various departments, such as Business Development, Projects, Procurement, Commercial, Finance, HR, etc.
- Great care is taken at the time of estimation so that we are not only competitive but also, to add positive contribution towards the growth of the Company.
- The Internal Auditors of the company conducts Financial, Operational and Management Audit of various functions and areas covered under Page [] of the Annual Report 2023-24. Their reports are placed before the Audit Committee / Board and appropriate actions as deemed fit are initiated based on the reports.

6. The Audit Committee / Board also oversees financial systems, procedures and internal controls and competent to call for any information/document from any department/function.

Human Resources and industrial relations

Human Resources Department (HRD) works continuously for maintaining healthy working relationship with the workers and other staff members. The underlying principle is that workers and staff at all levels are equally instrumental for attaining the Company's goals. The various functions are continuously strengthened by appropriate recruitment. Groups of Graduate Engineers are recruited every year & the Training programs are regularly conducted to update their skills and apprise them of latest techniques. The low attrition rate signifies healthy working relationship of employer and employee. Senior Management is easily accessible for counseling and redressal of grievances if any. The HR Department strives to maintain and promote harmony

and co-ordination amongst Workers, Staff and Members of the Senior Management. The Company has framed an Employee Stock Option Scheme (ESOP) with rules and regulations as an incentive to employees to increase productivity at all levels. The Industrial Relations in the Company's Units located at Murbad as well as in the Work Sites during the year under review was cordial.

Cautionary statement

The Management Discussion and Analysis describe Company's projections, expectations or predictions and are forward looking statements within the meaning of applicable laws and regulations. Actual results could differ materially from those expressed or implied. Important factors that could make a difference to the Company's operations include economic conditions affecting demand and supply and price conditions in domestic and international market, changes in Government Regulations, Tax Regimes, Economic Developments, the Covid-19 pandemic, and other related and incidental factors.

Conservation of Energy, Technology Absorption and Foreign Exchange Earnings and Outgo.

1. CONSERVATION OF ENERGY:

Murbad Works of the Company adopts a cautious approach in power and fuel consumption by optimizing the operation of shifts which has an impact of conservation of strict fuel consumption measures.

2. TECHNOLOGY ABSORPTION:

The Company closely monitors the various Technology Developments relevant to its business and keep absorbing such developments for up gradation and improvisation of its Manpower and Machinery.

During the Financial Year, details of Agreement entered for Technology Development are as follows:

<p>The Efforts made towards Technology Absorption</p>	<p>The Company has entered into an Agreement with The Material Works Limited (TMW) USA for Design, manufacture and supply of EPS Gen 4 cells exclusively in India and Bangladesh and to any other countries as mutually decided by the parties. TMW shall provide a license and rights to its EPS Gen 4/any latest Technology (along with the Patented Technology) and provide related technical support services to the Company, according to the terms agreed upon.</p>	<p>Agreement with TB Global Technologies Ltd (hereinafter referred as 'TBG'), a corporation organized and existing under the laws of Japan and having its registered office at 28F Kyobashi Edogrand, 2-2-1 Kyobashi, Chuo-ku. Tokyo. Japan.</p> <p>Agreement covers for promotion, manufacturing, sales, installation and maintenance of the products and services agreed to be introduced / sold under the mutually agreed brand name "LLOYDS TB-NIIGATA" (e.g. Non-Cryogenic MLA manufacturing Agreement" "Non-Cryogenic MLA Distribution Agreement" for TBG's products that are planned to be concluded between the parties in future). The Brand name "LLOYDS TB-NIIGATA" to be used in business promotion/marketing communication and wherever required during the tender/sales & marketing process and procedures.</p> <p>To enter/ undertake /execute various mutual business transactions/ arrangements and in particular to exclusively promote, manufacture, sell, install and maintain the products agreed between TBG and LEWL exclusively in the Republic of India.</p>
<p>The Benefits Derived Like Product Improvement, Cost Reduction, Product Development or Import Substitution</p>	<p>Design, manufacture and supply EPS Gen 4 cells with the following support from TMW:</p> <ol style="list-style-type: none"> a) All ongoing design improvements b) Technical training c) Access to all TMW marketing material d) Sales training and support <p>Normally cleaning surface of any steel requires pickling and that requires Acid which has lots of environmental issues to dispose off the spent acid.</p> <p>This technology eliminates the need of any acid and is completely environment friendly. All the grit material used is completely recyclable and there is zero effluent discharge except steel scrap which can be used for steel making. Eco pickling also</p>	<p>The Company shall manufacture, sell, install, and maintain products as defined by TBG exclusively in the Republic of India which will be beneficial for the growth of the Company. Both parties shall promote business activities in wide range of areas in co-operation with each other. TBG-NIIGATA is a renowned manufacturer of Marine Loading Arms, Truck/Rail Loading Arms and Floating Roof systems and has a technologically superior product. The main objective of this agreement is to increase the local manufacturing content in India so as to enable LEWL to qualify as Class 1 bidder as per classification of Atmnirbhar policy of the Govt of India.</p>

	eliminates need of oiling on the pickled surface. LEWL in future is poised to completely localise the EPS with the help of its state-of-the-art manufacturing facility. For clients, considerable CAPEX and OPEX benefits are envisaged.

I have conducted the secretarial audit of the compliance of applicable statutory provisions and the adherence to good corporate practices by **Lloyds Engineering Works Limited** **CIN: L28900MH1994PLC081235**, having its registered office at Plot No. A-5/5 MIDC Industrial Area Murbad Road, Thane-421401, Maharashtra, India and its corporate office at A-2, Madhu Estate, 2nd Floor, Pandurang Budhkar Marg, Lower Parel, Mumbai-400013, Maharashtra, India (hereinafter called "the Company"). Secretarial Audit was conducted in a manner that provided me a reasonable basis for evaluating the corporate conducts/statutory compliances and expressing my opinion thereon.

Based on my verification of the Company's books, papers, minute books, forms and returns filed and other records maintained by the Company and also the information provided by the Company, its officers, agents and authorized representatives during the conduct of secretarial audit, I hereby report that in my opinion, the Company has, during the audit period covering the financial year ended on **31st March, 2024** complied with the statutory provisions listed hereunder and also that the Company has proper board-processes and compliance-mechanism in place to the extent, in the manner and subject to the reporting made hereinafter:

I have examined the books, papers, minute books, forms and returns filed and other records maintained by the Company for the financial year ended on **31st March, 2024** according to the provisions of:

- i. The Companies Act, 2013 ("the Act") and the rules made thereunder;
- ii. The Securities Contracts (Regulation) Act, 1956 ("SCRA") and the rules made thereunder;
- iii. The Depositories Act, 1996 and the Regulations and Bye-laws framed thereunder;
- iv. Foreign Exchange Management Act, 1999 and the rules and regulations made thereunder to the extent of Foreign Direct Investment, Overseas Direct Investment and External Commercial Borrowings;

- v. The following Regulations and Guidelines prescribed under the Securities and Exchange Board of India Act, 1992 ("SEBI Act"):-
 - a. The Securities and Exchange Board of India (Substantial Acquisition of Shares and Takeovers) Regulations, 2011;
 - b. The Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations, 2015;
 - c. Securities and Exchange Board of India (Share Based Employee Benefits and Sweat Equity) Regulations, 2021;
 - d. The Securities and Exchange Board of India (Registrars to an Issue and Share Transfer Agents) Regulations, 1993 regarding the Companies Act and dealing with client;
 - e. The Securities and Exchange Board of India (Depository and Participants) Regulations 2018;
 - f. The Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018 and amendments from time to time;
 - g. The Securities and Exchange Board of India (Issue and Listing of Non-Convertible Securities) Regulations, 2021; **(There were no events requiring compliance during the audit period)**
 - h. The Securities and Exchange Board of India (Delisting of Equity Shares) Regulations, 2021; **(There were no events requiring compliance during the audit period)**
 - i. The Securities and Exchange Board of India (Buyback of Securities) Regulations, 2018; **(There were no events requiring compliance during the audit period)**
 - j. The Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015.

vi. The Management has identified and confirmed the following laws as specifically applicable to the Company:

1. Payment of Gratuity Act, 1972;
2. Maternity Benefits Act, 1961;
3. Negotiable Instrument Act, 1881;
4. Income Tax Act, 1961 and Indirect Tax Law;
5. Indian Stamp Act, 1999;
6. Electricity Act, 2003;

15. Water (Prevention & Control of Pollution) Act, 1974 and rules thereunder;
16. Air (Prevention & Control of Pollution) Act, 1981 and rules thereunder;
17. Goods and Service Tax.

I have also examined compliance with the applicable clauses of the following:

- i. Secretarial Standards with regard to Meeting of the Board of Directors (SS-1), General Meeting (SS-2), Secretarial Standard on Dividend (SS-3) and Secretarial Standard on Report of the Board of Directors (SS-4) issued by The Institute of Company Secretaries of India.
- ii. The Listing Agreements entered into by the Company with Stock Exchange(s) read with the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015.

During the period under review the Company has complied with the provisions of the Act, Rules, Regulations, Guidelines, Standards, etc. mentioned above.

I report that:

- The Board of Directors of the Company was duly constituted with proper balance of Executive Directors, Non-Executive Directors and Independent Directors. The changes in the composition of the Board of Directors that took place during the period under review were carried out in compliance with the provisions of the Act.

- Adequate notice was given to all Directors to schedule the Board Meetings, agenda and detailed notes on agenda were sent at least seven days in advance, and a system exists for seeking and obtaining further information and clarifications on the agenda items before the meeting for meaningful participation in the meeting.
- The decisions of the Board Meetings were carried out with requisite majority.
- As informed, the Company has responded appropriately to notices received from various statutory / regulatory authorities including actions for corrective measures, wherever found necessary.

I further report that there are adequate systems and processes in the company commensurate with the size and operations of the company to monitor and ensure compliance with applicable laws, rules, regulations and guidelines.

I further report during the audit period, the Company had following specific events/actions having a major bearing on the Company's affairs:

i. Allotment of equity shares pursuant to conversion of warrants.

The Board of the Directors of the Company has approved allotment of 7,50,00,000 Equity Shares of the Company to Promoter / Promoter Group pursuant to conversion of warrants as on 10th May, 2023.

7. Statement by director responsible for the business responsibility report, highlighting ESG related challenges, targets and achievements (listed entity has flexibility regarding the placement of this disclosure)

Company is in the design and manufacture of Process Equipment and Systems and turnkey projects. This business, especially, manufacturing, has an impact on the environment in terms of energy consumption. Given the strong growth aspiration of the Company, the biggest challenge is to balance the growth while minimizing its impact on the environment.

Energy transition from fossil fuels to green energy is a trend globally and the Company intends to reduce its presence across the fossil fuel space and move to green energy. The Company's aim, as it grows, is to make use of renewable energy across its operations.

The Manufacturing and turnkey projects business is very labour intensive, and the availability of skilled labour has become a challenge. This challenge could increase over time as India increases its thrust on infrastructure development. Recognizing this, the Company plans to strengthen its inhouse training program to upgrade the skill of the workers which will be a mutually beneficial. In addition, the Company plans to introduce latest technology to increase efficiency in manufacturing and at the same time reduce power consumption. These initiatives are intended to reduce manual component of work, increase worker productivity, reduce wastages and thereby, improve the cost competitiveness of the business and at the same time to conserve energy.

The Company's CSR program is focused on improving the quality of life of the communities by providing them with a good nutritious diet. We are Proud that Our Organization with the help of Akshaya Chaitanya an NGO in Mumbai with an attempt to make food accessible to the needy across Mumbai by serving them hot, nutritious, locally palatable meals prepared at their very own state-of-the-art FSSAI compliant kitchen. We were able to contribute with the NGO to scale up the operations and to feed about 14,000+ people every day with hot and nutritious meals.

This BRSR report proves our commitment to continuous improvement in sustainability, environment and social parameters while conducting business responsibly.

(Y/N) If yes, disclose whether targets set under the PAT scheme have been achieved. In case targets have not been achieved, provide the remedial action taken, if any.**

Not Applicable.

3. **Provide details of the following disclosures related to water, in the following format:**

Parameter	FY 2023-24 (Current Financial Year)	FY 2022-23 (Previous Financial Year)
Water withdrawal by source (in kilolitres)		
(i) Surface water	-	-
(ii) Groundwater	-	-
(iii) Third party water	23435	14678
(iv) Seawater / desalinated water	-	-
(v) Others	-	-
Total volume of water withdrawal (in kilolitres) (i + ii + iii + iv + v)	23435	14678
Total volume of water consumption (in kilolitres)	23435	14678
Water intensity per rupee of turnover (Water consumed / turnover)	37.54	46.95
Water intensity per rupee of turnover (Total Water consumption / Revenue from operations)	-	-
Water intensity per rupee of turnover adjusted for Purchasing Power Parity (PPP) (Total water consumption / Revenue from operations adjusted for PPP)	-	-
Water intensity in terms of physical output	-	-
Water intensity (optional) – the relevant metric may be selected by the entity	-	-

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

No

4. Provide the following details related to water discharged:

Parameter	FY 2023-24 (Current Financial Year)	FY 2022-23 (Previous Financial Year)
Water discharge by destination and level of treatment (in kilolitres)		
(i) To Surface Water		
- No treatment	-	-
- With treatment – please specify level of treatment	-	-
(ii) To Ground water		
- No treatment	-	-
- With treatment – please specify level of treatment	-	-
(iii) To Seawater		
- No treatment	-	-
- With treatment – please specify level of treatment	-	-
(iv) Sent to third parties		
- No treatment	-	-
- With treatment – please specify level of treatment	-	-
(v) Others		
- No treatment	-	-

Independent Auditors Report

To the Members of **Lloyds Engineering Works Limited** (Formerly known as Lloyds Steels Industries Ltd.)

Report on Audit of Standalone Financial Statements

Opinion

We have audited the accompanying financial statements of **Lloyds Engineering Works Limited** ("the Company"), which comprise the Balance Sheet as at 31st March, 2024, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows for the year ended on 31st March, 2024, and a summary of the significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2024, the profit and total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the

matters described below to be the key audit matters to be communicated in our report.

1. Investment in Shares

(Refer Note No. 7 of the standalone financial statements)

The company had invested in 10,00,00,000 equity shares of Re.1 each in Lloyds Infrastructure & Construction Limited (herein after referred as "LICL") in the second Quarter of FY 2023-24. The referred investment represented a substantial holding of 50% in LICL, thereby, establishing it as an associate entity within the corporate framework.

In the fourth quarter of FY. 2023-24, there was an increase in both the authorized share capital and the issued capital of LICL. As a result, the stake of the company in LICL decreased from 50% to 25%. Subsequently, in the same quarter, the company partly sold the Investments held in LICL, due to which the shareholding in LICL further reduced from 25% to 12.25%. This resulted in cessation of LICL as an associate of the company.

The Company has received the consideration for sale of the aforesaid 12.25% stake in LICL prior to 31st March 2024 and does not exercise control over this stake as at 31st March 2024

How the matter was addressed in our audit:

1. We have thoroughly reviewed the accounting treatment regarding the sale of the investment.
2. We have verified the receipt of the consideration of sale through inspection of bank statements and other supporting documents.
3. We reviewed the disclosures in the financial statements related to the sale of shares to ensure they are complete and accurate, providing sufficient information for users to understand the transaction and its financial impact.
4. We have also taken on record the Beneficial ownership pattern of equity shares of LICL duly certified by a professional Company Secretary as at 31st March 2024

2. Capital Work In Progress

(Refer Note No. 4 of the standalone financial statements)

The company had Capital Work in Progress (CWIP) of 1,064.66 Lakhs by the end of FY. 2023-24 which in comparison to last year was Rs. 2,555.31 Lakhs.

Comparing to the previous financial year, there is a decrease in the Capital Work in Progress (CWIP) balance due to

capitalisation of some of the assets to Property Plant and Equipment.

How the matter was addressed in our audit:

Our audit procedures to assess the accounting for CWIP included the following.

1. Evaluation of the completeness and accuracy of the project cost capitalized as CWIP. This includes reviewing invoices, contracts, and other supporting documentation.
2. Ensuring the cost capitalized meets the recognition criteria as per IND AS 16 'Property, Plant and Equipment'.
3. Evaluation of effectiveness of internal controls over capitalization of project costs.

3. Details Regarding OFCD, Warrants and Right Issues.

OFCD

The company issued 1,51,80,000 12% Optionally Fully Convertible Debentures (OFCD) having face value of Re. 1 each at Rs. 13.65 in FY 2021-22. The OFCDs shall be converted at the option of Debenture holder within a time frame of not exceeding 18 months from the date of allotment into one fully paid-up Equity shares.

In Current year there was an allotment of 1,51,80,000 Equity Shares of Face Value of Re. 1/- each pursuant to conversion of 12% Optionally Fully Convertible Debentures ("OFCDs") allotted on Preferential basis at a premium of Rs. 12.65 each to non-Promoters as per the Resolution passed at the meeting of the Board of Directors of the company on 1st July, 2023.

Warrants

The Board of Directors of the Company at its meeting held on 22nd November 2021 has made an allotment of 16,50,00,000 Convertible Warrants of Face Value of Re 1/- each at a premium of Rs. 2.86 to Promoter/ Promoter Group, on preferential allotment basis. Further the Board of Directors of the Company at its meeting held on 10th May, 2023 converted 7,50,00,000 Convertible Warrants of Face Value of Re 1/- each at a premium of Rs. 2.86 (Previous year 9,00,00,000 convertible warrants of face value of Re.1/- each at a premium of Rs. 2.86) to Promoter/ Promoter Group, on preferential allotment basis.

Right Issues

The Board of Directors at its meeting held on 18th January 2024 allotted 6,34,64,610 shares to the Equity Shareholders of the Company through Rights Issue in the ratio of 1 equity share for every 17 fully paid – up equity shares at issue price of Rs. 15.50 per equity Share (including a premium of Rs. 14.50 per equity Share). The Company has received a sum of Rs. 9,837.01 lakhs.

How the matter was addressed in our audit:

- 1) We have scrutinized the accounting treatment of Optionally Fully Convertible Debentures (OFCDs), Warrants, Right Issues.

- 2) The Company has adequately disclosed all pertinent information in relation to the aforesaid securities in its Notes to accounts.
- 3) We have verified relevant documents including board resolutions related to the OFCD, Warrants, Right Issues.
- 4) We have verified the receipt of consideration against the said securities and have found them to be received in full.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, (changes in equity) and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless

management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Standalone Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying

transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act 2013, we give in the 'Annexure A', a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by section 143(3) of the Act, we report that:
 - a. We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit.
 - b. In our opinion proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;

 - f. In our opinion, no financial transactions or matters have any adverse effect on the functioning of the company;
 - g. On the basis of the written representations received from the directors as on 31st March, 2024 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2024 from being appointed as a director in terms of Section 164 (2) of the Act;

- h. We do not have any qualification, reservation or adverse remark relating to the maintenance of accounts and other matters connected therewith.
- i. In our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the Company to its directors during the year is in accordance with the provisions of section 197 of the Act.
- j. With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate report in "Annexure B." Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's Internal Financial Controls over financial Reporting;
- k. With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us (As amended):
- i. The Company has disclosed the pending litigations which may impact its financial position in Note 22 of the financial statements.
 - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
 - iii. During the year, no amounts were required to be transferred to the Investor Education and Protection Fund by the Company. So, the question of delay in transferring such sums does not arise.
 - iv. a) The management has represented that, to the best of its knowledge and belief, other than as disclosed in the notes to accounts to the standalone Ind AS financial statements, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
 - b) The management has represented that, to the best of its knowledge and belief, no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and
- c) Based on such audit procedures performed that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub clause (a) and (b) contain any material misstatement.; and
- v. (a) The final dividend paid by the Company during the year, in respect of the same declared for the previous year is in accordance with Section 123 of the Act to the extent it applies to payment of dividend.
- (b) As stated in note 37 of the standalone financial statements, the Board of Directors of the Company has proposed final dividend at the rate of 20% i.e. 0.20 Paise, per equity share of Face value Re.1/- for the year which is subject to the approval of the members at the ensuing Annual General Meeting. The dividend declared is in accordance with Section 123 of the Act to the extent it applies to declaration of dividend.
- vi. Based on our examination, the Company has used accounting softwares for maintaining its books of account for the financial year ended March 31, 2024 which has a feature of recording audit trail (edit log) facility and the same has operated throughout the year for all relevant transactions recorded in the softwares. Further, during the course of our audit we did not come across any instance of the audit trail feature being tampered with.

Annexure - B to Independent Auditor's Report

(Referred to in Paragraph 2(j) under 'Report on Other legal and Regulatory Requirement' sections of our report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Lloyds Engineering Works Limited ("the Company") as of 31st March, 2024 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting with reference to these Standalone Financial Statements and such internal financial controls over financial reporting were operating effectively as at 31st March, 2024, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally

accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records reflecting in the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be

detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Statement of Change in Equity for the year ended 31st March, 2024

*Profit of Rs. 29.71 lakhs and Rs. 32.07 Lakhs on Remeasurement of defined Employee Benefit Plan (net of tax) is recognised as a part of retained earnings for the years ended March 31, 2024 and 2023, respectively.

During the year, the Board of Directors on May 10, 2023 approved the issuance and allotment of 7,50,00,000 (previous year 9,00,00,000 equity shares) equity shares of face value of Re. 1/- each ("Equity Shares") at a price of Rs. 3.86 each to the warrant holders i.e. Lloyds Metals & Minerals Trading LLP and Aeon Trading LLP pursuant to conversion of 7,50,00,000 convertible warrants ("Convertible Warrants") into equity shares of the Company in the ratio of 1:1 consequent to the exercise of the option to convert such Convertible Warrants into equity shares of the Company.

The Board of Directors at its meeting held on July 1, 2023 has considered and approved the allotment of 1,51,80,000 Equity Shares of Re. 1/- each at a premium of Rs. 12.65 each pursuant to conversion of 12% Optionally Fully Convertible Debentures ("OFCDs") consequent to exercise of the option to convert such OFCDs into Equity shares of the Company.

The Board of Directors at its meeting held on January 18, 2024 allotted 6,34,64,610 shares to the Equity Shareholders of the Company through Rights Issue at issue price of Rs. 15.50 per equity Share (including a premium of Rs. 14.50 per equity Share).

The Company has allotted 22,86,500 shares under 'Lloyds Steels Industries Limited Employee Stock Option Plan – 2021' to Lloyds Steels Employees Trust at a Price of Rs. 7.50 each. These stock options will be exercised by the employees within the time mentioned in "LLOYDS STEELS ESOP – 2021."

In view of the above the Paid-up Equity Share Capital of the Company was increased from Rs. 98,86,98,382 /- (98,86,98,382 Equity share of face value of Re. 1 each) to Rs. 1,14,46,29,492/- (1,14,46,29,492 Equity shares of face value of Re. 1 each).

During the year, the Company has granted 32,52,200 (previous year 1,00,61,000) options on April 27, 2023 under 'Lloyds Steels Employee Stock Option Plan – 2021' to the eligible employees of the Company at an exercise price of Rs. 9.50 each. These stock options shall vest as per the vesting schedule as mentioned in LLOYDS STEELS ESOP – 2021."

Nature and Purpose of Reserves

a) Capital Reserve

This reserve represents profit and loss on purchase, sale, issue or cancellation of the Company's own equity instruments.

b) Retained Earnings

This reserve represents undistributed accumulated earnings of the Company as on the balance sheet date.

c) Share Based Payment Reserve

Share based payment reserve represents the cumulative expense recognized for equity-settled transactions at each reporting date until the employee share options are exercised/expired upon which such amount is transferred to Retained Earnings.

d) Securities Premium

Security Premium Reserve is the amount received over and above the face value of any share when the shares are issued, redeemed, and forfeited. Utilisation of Securities Premium is as per section 52 of The Companies Act, 2013.

Notes to Financial Statements

(All amounts are in Lakhs of Indian Rupees; unless stated otherwise)

1. Corporate Information

Lloyds Engineering Works Limited (Formerly known as Lloyds Steels Industries Limited) ('the Company') is domiciled and incorporated in India as a Limited Liability Company with its shares listed on the National Stock Exchange and the Bombay Stock Exchange. The Registered Office of the Company is situated at Plot No. A - 5/5, MIDC Industrial Area, Murbad, Thane - 421401. The Company is principally engaged in Design, Engineering, Manufacturing, Fabrication, Supply, Erection and Commissioning of all types of Mechanical, Hydraulic, Structural, Process Plants, Metallurgical, Chemical Plants Equipments including Marine Loading/Unloading Arms, Truck/Wagon Loading/Unloading Arms, Columns, Pressure Vessels, Dryers, Boilers, Power Plant, Steel Plant Equipments, Capital Equipments and execution of Turnkey and EPC Projects.

The name of the company has been changed from "**Lloyds Steels Industries Limited**" to "**Lloyds Engineering Works Limited**" with effect from July 25, 2023 and approved by Registrar of Companies.

2. Summary of Significant Accounting Policies

2.1 Basis of Preparation

This financial statement has been prepared to comply in all material respects with the Indian Accounting Standard ('Ind AS') notified under section 133 of the Companies Act, 2013, read with the Companies (Indian Accounting Standards) Rules as amended from time to time. In addition, the Guidance notes/announcements issued by the Institute of Chartered Accountants of India (ICAI) are also applied except where compliance with other statutory promulgations requires a different treatment.

Presentation of Financial Statements

The Balance Sheet and the Statement of Profit & Loss are prepared and presented in the format set out in Schedule III to the Companies Act, 2013 ("the Act"). The Cash flows Statement has been prepared and presented as per the requirements of Indian Accounting Standards (IND AS - 7) "Statement of Cashflows". The disclosure requirements with respect to items in the Balance Sheet and Statement of Profit & Loss as prescribed in the schedule III to the Act, are presented by way of notes forming parts of accounts along with the other notes required to be disclosed under the notified Indian Accounting Standards and the Equity Listing Agreement. Amounts in the financial statement are presented in Indian rupees in Lakhs.

The financial statements for the year ended March 31, 2024 are authorized for issue by the Company's Board of Directors at their meeting held on **May 2, 2024**.

The preparation of the said financial statements requires the use of certain critical accounting estimates and judgments. It also requires the management to exercise judgment in the process of applying the Company's accounting policies. The areas where estimates are significant to the financial statements, or areas involving a higher degree of judgment or complexity, are disclosed in Note 3.

The financial statements are based on the classification provisions contained in Ind-AS 1, 'Presentation of Financial Statements' and division II of schedule III of the Companies Act 2013 along with the other notes required to be disclosed under the notified Indian Accounting Standards and the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, for the purpose of clarity, various items are aggregated in the statement of profit and loss and balance sheet. Nonetheless, these items are dis-aggregated separately in the notes to the financial statements, where applicable or required.

The Company accrues individual items of income / expenses above Rs. 10,000/- per item.

All the amounts included in the financial statements are reported in Lakhs of Indian Rupees and are rounded to the nearest Lakhs, except per share data and unless stated otherwise.

2.2 Basis of Measurement

The financial statements have been prepared on the accrual and going concern basis and the historical cost convention except where the Ind -AS requires a different accounting treatment. Historical cost is generally based on fair value of the consideration given in exchange of Goods & Services.

Notes to Financial Statements

(All amounts are in Lakhs of Indian Rupees; unless stated otherwise)

Fair Value Measurement

Fair value is the price at the measurement date, at which an asset can be sold or paid to transfer a liability, in an orderly transaction between market participants. The Company wherever required has measured the Financial / non – Financial Assets and Liabilities at fair value in the Financial Statement.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

2.3 Foreign Currency Transactions

The financial statements are presented in Indian Rupees which is the functional and presentation currency of the Company.

Transactions in foreign currencies are initially recorded in the relevant functional currency at the rates prevailing on the date of the transaction.

Monetary Assets and Liabilities denominated in foreign currencies are translated into the functional currency at the closing exchange rate prevailing as at the reporting date with the resulting foreign exchange differences. On subsequent re-statement/settlement, the same is recognised in the statement of profit and loss within finance costs / finance income. Non-monetary assets and liabilities denominated in foreign currencies are translated into the functional currency using the exchange rate prevalent, at the date of initial recognition (in case they are measured at historical cost) or at the date when the fair value is determined (in case they are measured at fair value). Non-monetary assets and liabilities that are measured in terms of historical cost in foreign currencies are not retranslated.

2.4 Current Versus Non-Current Classification

The Company presents assets and liabilities in the Balance Sheet based on current / non-current classification.

Deferred Tax Assets and Liabilities and all assets and liabilities which are not current (as discussed in the below paragraphs) are classified as non-current assets and liabilities.

Operating cycle for the business activities of the company covers the duration of the specific project/contract/product line/service including the deferred liability period wherever applicable and extends up to the realisation of receivables (including retention monies) within the agreed credit period as the case may be. An asset is classified as current when it is expected to be realised or intended to be sold or consumed in normal operating cycle, held primarily for the purpose of trading, expected to be realised within twelve months after the reporting period, or cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

A liability is classified as current when it is expected to be settled in normal operating cycle, it is held primarily for the purpose of trading, it is due to be settled within twelve months after the reporting period, or there is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

2.5 Property, Plant and Equipment ('PPE')

An item is recognised as an asset, if and only if, it is probable that the future economic benefits associated with the item will flow to the Company and its cost can be measured reliably. PPE are initially recognised at cost. The initial cost of PPE comprises its purchase price (including non-refundable duties and taxes but excluding any trade discounts and rebates), and any directly attributable cost of bringing the asset to its working condition and location for its intended use.

Subsequent to initial recognition, PPE are stated at cost less accumulated depreciation and any impairment losses. When significant parts of Property, Plant and Equipment are required to be replaced in regular intervals, the Company recognises such parts as separate component of assets. When an item of PPE is replaced, then its carrying amount is de-recognised from the balance sheet and cost of the new item of PPE is recognised.

The expenditures that are incurred after the item of PPE has been put to use, such as repairs and maintenance, are normally charged to the statement of profit and loss in the period in which such costs are incurred. However, in situations where the said

Notes to Financial Statements

(All amounts are in Lakhs of Indian Rupees; unless stated otherwise)

expenditure can be measured reliably and is probable that future economic benefits associated with it will flow to the Company, it is included in the asset's carrying value or as a separate asset as appropriate.

Depreciation on PPE is computed using the straightline method over the estimated useful lives. Depreciation is provided as per useful life of the assets as prescribed in schedule II of the Companies Act. The Company has established the estimated range of useful lives of different categories of PPE as follows:

Particulars	Useful life (in years)
Factory Building	30 – 60
Plant & Machinery	15
Computers	3 – 6
Electrical Installations	10
Office Equipments and AC	5 – 8
Furniture and Fixtures	10
Motor Vehicles	8 – 10

The useful lives, residual values and depreciation method of PPE are reviewed and adjusted appropriately, at-least as at each reporting date so as to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits from these assets. The effects of any change in the estimated useful lives, residual values and/ or depreciation method are accounted prospectively, and accordingly the depreciation is calculated over the PPE's remaining revised useful life. The cost and the accumulated depreciation for PPE sold, scrapped, retired or otherwise disposed-off are derecognised from the balance sheet and the resulting gains/ (losses) are included in the statement of profit and loss within Other Income.

Assets individually costing Rs. 10,000/- or less are depreciated fully in the year of purchase.

All directly attributable expenditure and interest cost on Borrowed Capital during the project construction period are accumulated and shown as Capital Work-in-Progress until the project/assets are put to use. Assets under construction are not depreciated.

2.6 Intangible Assets

Identifiable intangible assets are generally recognised when the Company controls the asset and it is probable that future economic benefits attributed to the asset will flow to the Company and the cost of the asset can be measured reliably. The intangible assets are initially recognised at cost. Assets having finite useful life are carried at cost less accumulated amortisation and impairment losses, if any.

2.7 Impairment of Non-Financial Assets – PPE

- a. PPE and intangible assets with definite lives are reviewed for impairment, whenever events or changes in circumstances indicate that their carrying values may not be recoverable. For the purpose of impairment testing, the recoverable amount (that is, higher of the fair value less costs to sell and the value-in-use) is determined on an individual asset basis, unless the asset does not generate cash flows that are largely independent of those from other assets, in which case the recoverable amount is determined at the cash-generating-unit ('CGU') level to which the said asset belongs. If such individual assets or CGU are considered to be impaired, the impairment to be recognised in the statement of profit and loss is measured by the amount by which the carrying value of the asset/CGU exceeds their estimated recoverable amount and allocated on pro rata basis.

Impairment losses, if any, are recognised in statement of profit and loss.

Reversal of Impairment Losses

Impairment losses are reversed and the carrying value is increased to its revised recoverable amount provided that this amount does not exceed the carrying value that would have been determined had no impairment loss been recognised for the said asset in previous years.

b. Goodwill

Goodwill is an asset representing the future economic benefits arising from other assets acquired in a business combination that are not individually identified and separately recognised. Goodwill is initially measured at cost, being the net identifiable assets acquired and liabilities assumed, measured in accordance with Ind AS 103, Business Combinations.

Notes to Financial Statements

(All amounts are in Lakhs of Indian Rupees; unless stated otherwise)

Goodwill is considered to have indefinite useful life and hence is not subject to amortization but tested for impairment at least annually. After initial recognition, goodwill is measured at cost less any accumulated impairment

For the purpose of impairment testing, goodwill acquired in a Business Combination, is from the acquisition date, allocated to each of the Group's cash generating units (CGUs) that are expected to benefit from the combination. A CGU is the smallest identifiable Group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or Group of assets. Each CGU or a combination of CGUs to which goodwill is so allocated represents the lowest level at which goodwill is monitored for internal management purpose and it is not larger than an operating segment of the Group.

A CGU to which goodwill is allocated is tested for impairment annually, and whenever there is an indication that the CGU may be impaired, by comparing the carrying amount of the CGU, including the goodwill, with the recoverable amount of the CGU. If the recoverable amount of the CGU exceeds the carrying amount of the CGU, the CGU and the goodwill allocated to that CGU is regarded as not impaired. If the carrying amount of the CGU exceeds the recoverable amount of the CGU, the Group recognizes an impairment loss by first reducing the carrying amount of any goodwill allocated to the CGU and then to other assets of the CGU pro-rata based on the carrying amount of each asset in the CGU.

Any impairment loss on goodwill is recognized in the Statement of Profit and Loss. An impairment loss recognized on goodwill is not reversed in subsequent periods.

On disposal of a CGU to which goodwill is allocated, the goodwill associated with the disposed CGU is included in the carrying amount of the CGU when determining the gain or loss disposal.

2.8 Leases:

The Leases of Property, Plant and Equipment where the Company, as lessee, has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalized at the lease's inception at the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowings or other financial liabilities as appropriate.

Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Leases in which a significant portion of the risks and rewards of ownership are not transferred to the Company as lessee are classified as operating leases. Payments made under operating leases are charged to Statement of profit and loss on a straight-line basis over the period of the lease unless the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

In March 2019, the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) (Amendments) Rules, 2019, notifying Ind AS 116 - 'Leases'. This standard is effective from 1st April, 2019. The Standard sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract i.e., the lessee and the lessor. Ind AS 116 introduces a single lessee accounting model and requires a lessee to recognize assets and liabilities for all leases with a term of more than twelve months, unless the underlying asset is of low value. Ind AS 116 - Leases amends the rules for the lessee's accounting treatment of operating leases. According to the standard all operating leases (with a few exceptions) must therefore be recognized in the balance sheet as lease assets and corresponding lease liabilities. The lease expenses, which were recognised as a single amount (operating expenses), will consist of two elements: depreciation and interest expenses. The standard has become effective from 2019 and the Company has assessed the impact of application of Ind AS 116 on Company's financial statements and provided necessary treatments and disclosures as required by the standard. (Refer Note No 5).

The discount rate is generally based on the incremental borrowing rate specific to the lease being evaluated or for a portfolio of leases with similar characteristics.

Right to use asset

Right-to-use assets, are measured at cost less any accumulated depreciation and, if necessary, any accumulated impairment. The cost of a right-to-use asset comprises the present value of the outstanding lease payments plus any lease payments made at or before the commencement date less any lease incentives received, any initial direct costs and an estimate of costs to be incurred in dismantling or removing the underlying asset. In this context, the Company also applies the practical expedient that the payments for non-lease components are generally recognized as lease payments. If the lease transfers ownership of the underlying asset to the lessee at the end of the lease term or if the cost of the right-to-use asset reflects that the lessee will exercise a purchase

Notes to Financial Statements

(All amounts are in Lakhs of Indian Rupees; unless stated otherwise)

option, the right-to-use asset is depreciated to the end of the useful life of the underlying asset. Otherwise, the right-to-use asset is depreciated to the end of the lease term.

Lease liability

Lease liabilities, which are assigned to financing liabilities, are measured initially at the present value of the lease payments. Subsequent measurement of a lease liability includes the increase of the carrying amount to reflect interest on the lease liability and reducing the carrying amount to reflect the lease payments made.

2.9 Financial Instruments:

A financial instrument is a contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial Assets

Initial Recognition

All financial assets are recognized initially at fair value. Transaction costs that are directly attributable to the acquisition of financial assets (other than financial assets at fair value through profit or loss) are added to the fair value measured on initial recognition of financial asset. However, trade receivable that do not contain a significant financing component are measured at transaction price.

Subsequent Measurement

The subsequent measurement of the non-derivative financial assets depends on their classification as follows:

Financial Assets Measured at Amortised Cost

Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. However, where the impact of discounting / transaction costs is significant, the amortised cost is measured using the effective interest rate ('EIR') method. Interest income from these financial assets is included in Other Income.

Fair Value through Other Comprehensive Income (FVOCI):

Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, the same are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognized in profit and loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss and recognized in other gains/ (losses). Interest income from these financial assets is included in other income using the effective interest rate method.

Fair Value through Profit or Loss

Assets that do not meet the criteria for amortized cost or FVOCI are measured at fair value through profit or loss. A gain or loss on debt investment that is subsequently measured at fair value through profit or loss is recognized in profit or loss and presented net in the statement of profit and loss in the period in which it arises. Interest income from these financial assets is included in other income.

Impairment

The impairment of assets depends on whether there has been a significant increase in the credit risks since initial recognition. Accordingly, the Company deals with providing for impairment of loss. In case of trade receivables, the Company applies the simplified approach which requires expected lifetime losses to be recognised from initial recognition of the receivables.

Financial Liabilities

Initial Recognition

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Subsequent Recognition

The subsequent measurement of financial liabilities depends on their classification, as described below:

Notes to Financial Statements

(All amounts are in Lakhs of Indian Rupees; unless stated otherwise)

Financial liabilities at fair value through profit or loss

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. Changes in fair value of such liability are recognized in the statement of profit or loss.

Financial liabilities at amortized cost

The Company's financial liabilities at amortized cost are initially recognized at net of transaction costs and includes trade payables, borrowings including bank overdrafts and other payables.

After initial recognition, financial liabilities are subsequently measured at amortized cost using the effective interest rate (EIR) method except for deferred consideration recognized in a business combination which is subsequently measured at fair value through profit and loss. Gains and losses are recognized in the statement of profit and loss when the liabilities are derecognized as well as through the EIR amortization process. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss.

De-recognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

2.10 Taxes

The income tax expense comprises of current and deferred income tax. Income tax is recognised in the statement of profit and loss, except to the extent that it relates to items recognised in the other comprehensive income or directly in equity, in which case the related income tax is also recognised accordingly.

a. Current Tax

The current tax is calculated on the basis of the tax rates, laws and regulations, which have been enacted or substantively enacted as at the reporting date. The payment made in excess/ (shortfall) of the Company's income tax obligation for the period are recognised in the balance sheet as current income tax assets/liabilities.

Any interest, related to accrued liabilities for potential tax assessments are not included in Income tax charge or credit, but are rather recognised within finance costs.

b. Deferred Tax

Deferred tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying values in the financial statements. However, deferred tax are not recognised if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. However, if these are unabsorbed depreciation, carry forward losses and items relating to capital losses, deferred tax assets are recognised when there is reasonable certainty that there will be sufficient future taxable income available to realise the assets. Deferred tax assets in respect of unutilized tax credits which mainly relate to minimum alternate tax are recognised to the extent it is probable that such unutilized tax credits will get realised.

The unrecognised deferred tax assets/carrying amount of deferred tax assets are reviewed at each reporting date for recoverability and adjusted appropriately. Deferred tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the reporting date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Income tax assets and liabilities are off-set against each other and the resultant net amount is presented in the balance sheet, if and only when, (a) the Company currently has a right to set-off the current income tax assets and liabilities, and (b) when it relates to income tax levied by the same taxation authority and where there is an intention to settle the current income tax balances on net basis.

Notes to Financial Statements

(All amounts are in Lakhs of Indian Rupees; unless stated otherwise)

2.11 Inventories

Inventories are stated at the lower of cost (determined using weighted average cost method) and net realisable value. The costs comprise its purchase price and any directly attributable cost of bringing to its present location and condition. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated variable costs necessary to make the sale.

Following are general practice adopted by the company for valuation of Inventory.

Sr. No.	Type of Inventory	Valuation methodology
1	Raw Materials	*At lower of cost and net realizable value.
2	Stores and Spares	At cost.
3	Work-in-process/Semi-Finished Goods	At cost.
4	Engineering Plant Finished Goods	At lower of cost and Market Value
5	Finished Goods/Traded Goods	At lower of cost and Market Value
6	Scrap Material	At Net Realisable Value
7	Tools and Equipments	At lower of cost and disposable value

*Material and other supplies held for use in the production of the inventories are not written down below cost if the finished goods in which they will be incorporated are expected to be sold at or above cost.

2.12 Cash and Cash Equivalents

Cash and cash equivalents include cash in hand, bank balances and fixed deposits including deposits towards margin money.

2.13 Share Capital

The Company has only one class of shares i.e. Equity Shares having par value of Re 1/- each per equity share. The dividend and repayment of capital are at the sole and absolute discretion of the Company and there is no contractual obligation whatsoever to that effect.

2.14 Employee Benefits

The Company's employee benefits mainly include wages, salaries, bonus, defined benefit plans, compensated absences. The employee benefits are recognised in the year in which the associated services are rendered by the Company employees.

a. Short Term Employee Benefits

Employee benefits such as salaries, wages, short term compensated absences, expected cost of bonus, ex-gratia and performance-linked rewards falling due wholly within twelve months of rendering the service are classified as short term employee benefits and are expensed in the period in which the employee renders the related service.

b. Post Employment Benefits – Gratuity

The Company operates one defined benefit plan, viz., Gratuity benefit, for its employees. The Gratuity plan provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount equivalent to 15 days basic salary payable for each completed year of service. The Company does not have any fund for gratuity liability and the same is accounted for as provision.

The Company provides for the liability towards the said plans on the basis of actuarial valuation carried out yearly as at the reporting date, by an independent qualified actuary using the projected unit- credit method.

The obligation towards the said benefits is recognised in the balance sheet, at the present value of the defined benefit obligations. The present value of the said obligation is determined by discounting the estimated future cash outflows.

The interest expense is calculated by applying the above mentioned discount rate to the defined benefit obligations liability. The interest expense on the defined benefit liability is recognised in the statement of profit and loss. However, the related re-measurements of the defined benefit liability is recognised directly in the other comprehensive income in the period in which it arises. The said re-measurements comprise of actuarial gains and losses (arising from experience adjustments and

Notes to Financial Statements

(All amounts are in Lakhs of Indian Rupees; unless stated otherwise)

changes in actuarial assumptions). Re-measurements are not re-classified to the statement of profit and loss in any of the subsequent periods.

c. Other Employee Benefits – Leave Encashment

Under the other long term employee benefit plan, the company extends benefit of compensated absences to the employees, whereby they are eligible to carry forward their entitlement of earned leave for encashment upon retirement/ separation or during tenure of service. The Plan is not funded by the Company.

The Company provides for the liability towards the said benefit on the basis of actuarial valuation carried out yearly as at the reporting date, by an independent qualified actuary using the projected unit- credit method. The related re-measurements are recognised in the statement of profit and loss in the period in which they arise.

d. Stock Options

Stock Options are granted to eligible employees under the LLOYDS STEELS ESOP – 2021, as may be decided by the Nomination & Compensation Committee / Board. Eligible employees for this purpose include employees of the company. Under Ind AS, the cost of Stock Options is recognised based on the fair value of Stock Options as on the grant date.

While the fair values of Stock Options granted is recognised in the Statement of Profit and Loss for employees of the company (other than those out on deputation).

2.15 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of past event and it is probable that an outflow of resources will be required to settle the said obligation and the amounts of the said obligation can be reliably estimated. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates.

2.16 Amortisation of Expenses

Deferred Revenue Expenditure is amortised over a period of five years.

2.17 Contingencies

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Contingent assets are disclosed where an inflow of economic benefits is certain.

2.18 Revenue Recognition

Revenue is recognised upon transfer of control of promised goods to customers i.e., when the performance obligation gets fulfilled in an amount that reflects the consideration which the company expects to receive in exchange for that particular performance obligation.

Revenue is measured based on the transaction price, which is the net of variable consideration, adjusted for discounts, price concessions and incentives, if any, as specified in the contract with the customer. Revenue also excludes taxes collected from customers.

a. Revenue From Operations

i. Sale of Goods

Revenue from the sale of manufactured and traded goods is recognised when significant risks and rewards of ownership of goods have been transferred, effective control over the goods no longer exists with the Company, amount of revenue / costs in respect of the transactions can reliably be measured and probable economic benefits associated with the transactions will flow to the Company.

ii. Rendering of Services

Revenue in case of contracts/orders spreading over more than one financial year are booked to the extent of work billed. Sales include export benefits & net of sales return. Export benefits accrue on the date of export, which are utilized for custom duty-free import of material/ transferred for consideration.

Notes to Financial Statements

(All amounts are in Lakhs of Indian Rupees; unless stated otherwise)

iii. Revenue Recognition on Percentage Completion Basis

In case of unbilled work, Revenue is recognised when significant portion of the work exceeding 75% is completed. Till such time the unbilled work is carried at cost in Work-In-Progress.

b. Other Revenue

1) Customs Duty

Customs Duty/incentive entitlement as and when eligible is accounted on accrual basis. Accordingly, import duty benefits against exports effected during the year are accounted on estimate basis as incentive till the end of the year in respect of duty free imports of raw material yet to be made.

2) Interest Income

Interest income is accrued on a time basis by reference to the principal outstanding and the effective interest rate.

3) Other Income/Miscellaneous Income

Other items of income are accounted as and when the right to receive such income arises and it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably.

2.19 Borrowing Costs

- i. Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.
- ii. All other borrowing costs are recognised in Statement of Profit and Loss in the period in which they are incurred.
- iii. The Company determines the amount of borrowing costs eligible for capitalisation as the actual borrowing costs incurred on that borrowing during the period less any interest income earned on temporary investment of specific borrowings pending their expenditure on qualifying assets, to the extent that an entity borrows funds specifically for the purpose of obtaining a qualifying asset. In case if the Company borrows generally and uses the funds for obtaining a qualifying asset, borrowing costs eligible for capitalisation are determined by applying a capitalisation rate to the expenditures on that asset. The Company suspends capitalisation of borrowing costs during extended periods in which it suspends

2.20 Earnings Per Share ('EPS')

Basic earnings per share is calculated by dividing the net profit attributable to the equity shareholders of the Company with the weighted average number of equity shares outstanding during the financial year, adjusted for treasury shares.

Diluted Earnings per share is calculated by dividing net profit attributable to the equity shareholders of the Company with the weighted average number of shares outstanding during the financial year, adjusted for the effects of all dilutive potential equity shares.

2.21 Statement of Cash Flows

Statement of Cash Flows is prepared segregating the cash flows into operating, investing and financing activities. Cash flow from operating activities is reported using indirect method, adjusting the net profit for the effects of:

- i. changes during the period in inventories and operating receivables/payables transactions of a non-cash nature;
- ii. non-cash items such as depreciation, provisions, deferred taxes, unrealised foreign currency gains and losses and undistributed profits of associates; and
- iii. All other items for which the cash effects are investing or financing cash flows.

2.22 Unclaimed Dividend

The Ministry of Corporate Affairs had notified provisions relating to unpaid / unclaimed dividend under Sections 124 and 125 of the Companies Act, 2013 and the Investor Education and Protection Fund (Accounting, Audit, Transfer and Refund) Rules, 2016 (IEPF Rules)

Notes to Financial Statements

(All amounts are in Lakhs of Indian Rupees; unless stated otherwise)

As per these Rules, dividends which are not encashed / claimed by the shareholder for a period of seven consecutive years shall be transferred to the Investor Education and Protection Fund (IEPF) Authority. The IEPF Rules mandate the companies to transfer such shares of Members of whom dividends remain unpaid / unclaimed for a period of seven consecutive years to the demat account of IEPF Authority.

2.23 Dividend Distribution

Dividends paid (including income tax thereon) are recognised in the period in which the interim dividends are approved by the Board of Directors, or in respect of the final dividend when approved by shareholders.

3. Critical Judgements and Estimation in applying the Company's Accounting Policies

The estimates and judgements used in the preparation of the financial statements are based on historical experience and various other assumptions and factors (including expectations of future events), that the Company believes to be reasonable under the existing circumstances. The said estimates and judgements are based on the facts and events, that existed as at the reporting date, or that occurred after that date but provide additional evidence about conditions existing as at the reporting date.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates include useful lives of Property, Plant and Equipment, Intangible Assets, allowance for doubtful debts/advances, future obligations in respect of retirement benefit plans, expected cost of completion of contracts, provision for rectification costs, fair value measurement etc. Difference, if any, between the actual results and estimates is recognised in the period in which the results are known.

The areas involving critical estimates and judgements are:

- a) Estimation of current tax expenses and payable.
- b) Recognition of deferred tax assets for carried forward tax losses - Refer Note No. 10
- c) Revenue Recognition - Refer Note No. 23
- d) Estimation of defined benefit obligation – Refer Note No. 28

Allocation of Goodwill to cash generating units

Goodwill is allocated to the following cash generating unit ("CGU") for impairment testing purpose

(Rs in Lakhs)

Particulars	As at 31 st March, 2024	As at 31 st March, 2023
Engineering Business	95.98	95.98

The recoverable amount of this CGU for impairment testing is determined based on value-in-use calculations which uses cash flow projections based on financial budgets approved by management covering a five-year period (Previous year - five year), as the Company believes this to be the most appropriate timescale for reviewing and considering annual performance before applying a fixed terminal value multiple to the final cash flows.

As at 31st March, 2024 and 31st March, 2023, goodwill in respect of Engineering Business was not impaired

Key Assumptions used for value in use calculations are as follows:

Particulars	31 st March, 2024	31 st March, 2023
Compounded average net sales growth rate for five years period	26.00 %	31.00 %
Growth rate used for extrapolation of cash flow projections beyond the period	4.00 %	4.00 %
Discount rate	10.00 %	10.00 %

Management believes that any reasonable possible change in any of these assumptions would not cause the carrying amount to exceed its recoverable amount.

Discount Rates -

Management estimates discount rates using pre-tax rates that reflect current market assessment of the risks specific to the CGU, taking into consideration the time value of money and individual risks of the underlying assets that have not been incorporated in the cash flow estimates. The discount rate calculation is based on the specific circumstances of the Company and its operating segments and is derived from its weighted average cost of capital.

Growth Rates -

The growth rates are based on industry growth forecasts. Management determines the budgeted growth rates based on past performance and its expectations on demand condition. The weighted average growth rates used are consistent with industry reports.

28. Employee Benefits Expenses as per IND AS – 19. (Contd.)

Defined Benefit Plan

The Company operates one Defined Benefit Plan, viz., Gratuity Benefit, for its employees. The Gratuity Plan provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount equivalent to 15 days basic salary payable for each completed year of service as per the Payment of Gratuity Act. The Company does not have any fund for Gratuity Liability and the same is accounted for as provision.

Under the other long term employee benefit plan, the Company extends benefit of compensated absences to the employees, whereby they are eligible to carry forward their entitlement of earned leave for encashment upon retirement / separation or during tenure of service. The Plan is not funded by the Company.

Compensated Absences

Compensated absences which are expected to occur within twelve months after the end of the period in which the employee renders the related services are recognised as undiscounted liability at the balance sheet date. Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related services are recognised as an actuarially determined liability at the present value of the defined benefit obligation at the Balance Sheet Date.

Defined Contribution Plan

Contributions to Defined Contribution Plans are recognised as expense when employees have rendered services entitling them to such benefits.

The Group provides benefits such as Provident Fund Plans to its employees which are treated as Defined Contribution Plans.

The details of Defined Benefit Obligations are as follows:

Particulars	31 st March, 2024		31 st March, 2023

28. Employee Benefits Expenses as per IND AS – 19. (Contd.)

Due to its Defined Benefit Plans, the Company is exposed to the following significant risks:

Changes in Bond Yields - A decrease in bond yields will increase plan liability.

Salary Risk - The present value of the Defined Benefit Plans Liability is calculated by reference to the future salaries of the plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

Existing Assumptions

(Rs in Lakhs)

Particulars	As at 31 st March, 2024	As at 31 st March, 2023
Discount Rate	7.10 %	7.40 %
Salary Escalation Rate	8.00 %	8.00 %
Withdrawal Rate	1.00 %	1.00 %
Mortality Rate	Indian Assured Lives Mortality (2012-14)	Indian Assured Lives (2012- 14)
Retirement Age	62 Years	58 - 62 Years

The Company regularly assesses these assumptions with the projected long-term plans and prevalent industry standards.

The impact of sensitivity due to changes in the significant actuarial assumptions on the defined benefit obligations is given in the table below:

(Rs in Lakhs)

Particulars	Change in Assumption	31 st March, 2024		31 st March, 2023	
		Gratuity	Compensated Absence	Gratuity	Compensated Absence
Discount Rate	+1%	389.19	52.85	348.96	50.25
	-1%	452.53	64.33	404.43	59.08
Salary Growth Rate	+1%	451.89	64.21	403.97	59.00
	+1%	389.16	52.85	348.84	50.24
Withdrawal Rate	+1%	416.78	57.65	374.48	54.27
	-1%	420.52	58.53	375.16	54.40

The above sensitivity analysis is determined based on a method that extrapolates the impact on the net defined benefit obligations as a result of reasonable possible changes in the significant actuarial assumptions. Further, the above sensitivity analysis is based on a reasonably possible change in a particular under-lying actuarial assumption, while assuming all other assumptions to be constant. In practice, this is unlikely to occur and changes in some of the assumptions may be correlated.

The Financial Risk Management for the Company is driven by the Company's Senior Management and internal/ external experts subject to necessary supervision.

The Company does not undertake any speculative transactions either through derivatives or otherwise. The senior management is accountable to the Board of Directors and Audit Committee. They ensure that the Company's financial risk-taking activities are governed by appropriate financial risk governance frame work, policies and procedures. The Board of Directors periodically reviews the exposures to financial risks, and the measures taken for risk mitigation and the results thereof.

i) Foreign Currency Risk

Foreign Exchange Risk arises on all recognised monetary assets and liabilities and on highly probable forecasted transactions which are denominated in a currency other than the functional currency of the Company. The Company has foreign currency trade payables and advance from customers.

The Foreign Exchange Risk Management Policy of the Company requires it to manage the foreign exchange risk by transacting as far as possible in the functional currency.

36. Financial and Capital Risk (Contd.)

ii) Price Risk

The Company uses surplus fund in operations and for further growth of the Company. Hence, there is no price risk associated with such activity.

iii) Credit Risk

Credit risk refers to the risk of default on its obligation by the counter-party, the risk of deterioration of creditworthiness of the counter-party as well as concentration risks of financial assets and thereby exposing the Company to potential financial losses. The Company is exposed to credit risk mainly with respect to trade receivables.

Trade Receivables

The Trade receivables of the Company are typically non-interest bearing un-secured. As there is no independent credit rating of the customers available with the Company, the management reviews the credit-worthiness of its customers based on their financial position, past experience and other factors. The credit risk related to the trade receivables is managed / mitigated by concerned team based on the Company's established policy and procedures and by setting appropriate payment terms and credit period. The credit period provided by the Company to its customers depend upon the contractual terms with the customers.

The ageing analysis of Trade Receivables as at the reporting date is as follows:

(Rs in Lakhs)

Particulars	Less than six months	More than six months
Trade Receivables as at 31 st March, 2024	15,136.97	44.10
Trade Receivables as at 31 st March, 2023	2,902.48	6.97

The Company performs on-going credit evaluations of its customer's financial condition and monitors the credit-worthiness of its customers to which it grants credit in its ordinary course of business. The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amount due or there are some disputes which in the opinion of the management is not in the Company's favour. Where the financial asset has been written-off, the Company continues to engage in enforcement activity to attempt to recover the receivable due. Where recoveries are made, these are recognised in profit and loss.

iv) Liquidity Risk

Liquidity Risk is the risk that the Company will not be able to meet its financial obligations as they become due. Accordingly, as a prudent liquidity risk management measure, the Company closely monitors its liquidity position and deploys a robust cash management system.

Based on past performance and current expectations, the Company believes that the Cash and Cash equivalents and cash generated from operations will satisfy its working capital needs, capital expenditure, investment requirements, commitments and other liquidity requirements associated with its existing operations, through at least the next twelve months.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments: -
